These challenges and issues can lead to difficulty comprehending core academic topics for those learning the English language. *Optimizing Elementary Education for English Language Learners* is a critical scholarly publication that explores the importance of English as a Second Language (ESL) education as well as the challenges that can arise in striving for effective and engaging learning environments for the students involved. Featuring a broad scope of topics such as effective lesson plans, teacher education and preparation, and the education achievement gap, this book is geared toward academicians, practitioners, and researchers seeking current research on effective teaching strategies for teachers of English language learners.

Business Communication: Rhetorical Situations Heather Graves, Roger Graves, 2021-03-25 Business and professional communication takes place in a dynamic ever-changing environment. How can we best help students prepare to communicate in such a challenging environment? The pedagogies of the twentieth century lectures, quizzes, and exams have not kept up to these new demands for student engagement. *Business Communication: Rhetorical Situations* supports more interactive and collaborative pedagogies to motivate students. Each chapter has two or three cases that challenge students to apply the business communication concepts they are learning to a specific set of circumstances. These cases are drawn from real-life communication situations and invite students to think through a communication situation and take action. After each case, challenges and exercises provide more opportunities for students to analyze and reflect on business documents and practice the skills discussed in the case themselves. Throughout, rhetorical concepts such as audience, genre, and purpose are central, and collaboration and creativity are encouraged.

Unlocking English Learners' Potential Diane Staehr Fenner, Sydney Snyder, 2017-05-16 Schools are not intentionally equitable places for English learners to achieve, but they could be if the right system of support were put in place. Diane Staehr Fenner and Sydney Snyder recommend just such a system. Not only does it have significant potential for providing fuller access to the core curriculum, it also provides a path for teachers to travel as they navigate the individual needs of students and support their learning journeys. Douglas Fisher, Coauthor of *Visible Learning for Literacy*. A once-in-a-generation text for assisting a new generation of students. Content teachers and ESOL teachers take special note if you're looking for a single resource to help your English learners meet the same challenging content standards as their English proficient peers, your search is complete.
