**and Language** , 2019-02-18 Science Inquiry Argument and Language describes research that has focused on addressing the  
issue of embedding language practices within science inquiry through the use of the Science Writing Heuristic approach In  
recent years much attention has been given to two areas of science education scientific argumentation and science literacy  
The research into scientific argument have adopted different orientations with some focusing on science argument as  
separate to normal teaching practices that is teaching students about science argument prior to using it in the classroom  
context while others have focused on embedding science argument as a critical component of the inquiry process The current  
emphasis on science literacy has emerged because of greater understanding of the role of language in doing and reporting  
on science Science is not viewed as being separate from language and thus there is emerging research emphasis on how best  
to improving science teaching and learning through a language perspective Again the research orientations are parallel to  
the research on scientific argumentation in that the focus is generally between instruction separate to practice as opposed to  
embedding language practices within the science classroom context      Catalog National Library of Medicine (U.S.), 1966 Vol
