Modeling and Simulation in Engineering, Economics, and Management María Ángeles Fernández-Izquierdo, María Jesús Muñoz-Torres, Raúl León, 2013-06-01 This book contains the refereed proceedings of the International Conference on Modeling and Simulation in Engineering Economics and Management MS 2013 held in Castell n de la Plana Spain in June 2013 The event was co organized by the AMSE Association and the SoGReS Research Group of the Jaume I University This edition of the conference paid special attention to modeling and simulation in diverse fields of business management The 28 full papers in this book were carefully reviewed and selected from 65 submissions They are organized in topical sections on modeling and simulation in CSR and sustainable development modeling and simulation in finance and accounting modeling and simulation in management and marketing modeling and simulation in economics and politics knowledge based expert and decision support systems and modeling and simulation in engineering **Practical Guide to RF-MEMS** Jacopo

Iannacci, 2013-08-12 Closes the gap between hardcore theoretical and purely experimental RF MEMS books The book covers from a practical viewpoint the most critical steps that have to be taken in order to develop novel RF MEMS device concepts Prototypical RF MEMS devices both including lumped components and complex networks are presented at the beginning of the book as reference examples and these are then discussed from different perspectives with regard to design simulation packaging testing and post fabrication modeling Theoretical concepts are introduced when necessary to complement the practical hints given for all RF MEMS development stages Provides researchers and engineers with invaluable practical hints on how to develop novel RF MEMS device concepts Covers all critical steps dealing with design simulation optimization characterization and fabrication of MEMS for radio frequency applications Addresses frequently disregarded issues explicitly treating the hard to predict interplay between the three dimensional device structure and its electromagnetic functionality Bridges theory and experiment fundamental concepts are introduced with the application in mind and simulation results are validated against experimental results Appeals to the practice oriented R D reader design and simulation examples are based on widely known software packages such as ANSYS and the hardware description language Verilog Physics of

Semiconductor Devices V. K. Jain, Abhishek Verma, 2013-11-27 The purpose of this workshop is to spread the vast amount of information available on semiconductor physics to every possible field throughout the scientific community As a result the latest findings research and discoveries can be quickly disseminated This workshop provides all participating research groups with an excellent platform for interaction and collaboration with other members of their respective scientific community This workshop s technical sessions include various current and significant topics for applications and scientific developments including Optoelectronics VLSI ULSI Technology Photovoltaics MEMS Sensors Device Modeling and Simulation High Frequency Power Devices Nanotechnology and Emerging Areas Organic Electronics Displays and Lighting Many eminent scientists from various national and international organizations are actively participating with their latest

research works and also equally supporting this mega event by joining the various organizing committees

Exponential Data Fitting and Its Applications Victor Pereyra, Godela Scherer, 2010 Real and complex exponential data fitting is an important activity in many different areas of science and engineering ranging from Nuclear Magnetic Resonance Spectroscopy and Lattice Quantum Chromodynamics to Electrical and Chemical Engineering Vision a

New Developments and Applications in Sensing Technology Subhas Chandra Mukhopadhyay, Aimé Lay-Ekuakille, Anton Fuchs, 2011-01-22 This book has focussed on different aspects of smart sensors and sensing technology i.e. intelligent measurement information processing adaptability recalibration data fusion validation high reliability and integration of novel and high performance sensors in the areas of magnetic ultrasonic vision and image sensing wireless sensors and network microfluidic tactile gyro flow surface acoustic wave humidity and ultra wide band While future interest in this field is ensured by the constant supply of emerging modalities techniques and engineering solutions as well as an increasing need from aging structures many of the basic concepts and strategies have already matured and now offer opportunities to build upon The book has primarily been focussed for postgraduate and research students working on different aspects of design and developments of smart sensors and sensing technology

Co-simulations of Microwave Circuits and High-Frequency Electromagnetic Fields Mei Song Tong, Xiao Yu Li, 2024-07-03 This book aims to provide many advanced application topics for microwave circuits and high frequency electromagnetic EM fields by using advanced design system ADS and high frequency structure simulator HFSS as simulation platforms In particular it contains the latest multidisciplinary co simulation guidance on the design of relevant components and devices Currently the circuit field design and performance analysis and optimization strongly rely on various kinds of robust electronic design automation EDA software RF microwave engineers must grasp two or more types of related simulation design software ADS by Keysight and HFSS by Ansys are the representative for circuit simulations and for field and structural simulations of microwave devices respectively At present these two types of software are widely used in enterprises universities and research institutions The main purpose of this book is to enable readers who are interested in microwave engineering and applied electromagnetics to master the applications of these two tools It also helps readers expand their knowledge boundaries behind those types of software and deepen their understanding of developing interdisciplinary technologies by co simulations The book is divided into three parts The first part introduces the two latest versions of ADS and HFSS and helps readers better understand the basic principles and latest functions better It also advises how to choose appropriate simulation tools for different problems The second part mainly describes co simulations for high frequency EM fields microwave circuits antenna designs EM compatibility EMC and thermal and structural analyses It provides guides and advices on performing co simulations by ADS and HFSS incorporated with other types of software respectively The last part narrates the automation interfaces and script programming methods for co simulations It primarily deals with the Advanced Extension Language AEL Python Data Link

PDL and MATLAB interface in ADS For HFSS it discusses VBScript IronPython scripting and Application Programming Interface APIs based on MATLAB Each topic contains practical examples to help readers understand so that they can gain a solid knowledge and skills regarding automated interfaces and scripting methods based on these kinds of software Concisely written in combination with practical examples this book is very suitable as a textbook in introductory courses on microwave circuit and EM simulations and also as a supplementary textbook in many courses on electronics microwave engineering communication engineering and related fields As well it can serve as a reference book for microwave engineers and researchers

Advances in Ubiquitous Networking 2 Rachid El-Azouzi, Daniel Sadoc Menasche, Essaïd Sabir, Francesco De Pellegrini, Mustapha Benjillali, 2016-11-03 This volume offers the proceedings of the 2nd UNet conference held in Casablanca May 30 June 1 2016 It presents new trends and findings in hot topics related to ubiquitous computing networking covered in three tracks and three special sessions Main Track 1 Context Awareness and Autonomy Paradigms Track Main Track 2 Mobile Edge Networking and Virtualization Track Main Track 3 Enablers Challenges and Applications Special Session 1 Smart Cities and Urban Informatics for Sustainable Development Special Session 2 Unmanned Aerial Vehicles From Theory to Applications Special Session 3 From Data to Knowledge Big Data applications and solutions

Physical Modeling, Simulation and Measurements of Packaging Structures for Compact Electronic Systems Enrique Diaz-Alvarez, 2000

Antenna Architectures for Future Wireless Devices Shibani Kishen Koul, Karthikeya G. S., 2022-01-03 This book presents the design requirements of antenna integration for modern commercial devices such as smartphones dongles and access points Practical use case scenarios of smartphone and the design process of the antenna system for the same are highlighted The feasibility of scaling up sub 6GHz to mmWave antennas is also discussed in detail followed by a plethora of design examples which could be panel mounted to modern day commercial smartphones The unique requirement of gain switchability is introduced with feasible practical antenna designs High efficiency antennas for 5G base stations is introduced along with a design example on planar all metallic antenna Beam switchability requirement for base station is illustrated with a couple of compact antenna system examples Variety of feeding techniques for mmWave antennas is elaborated in this book Finally low cost antenna designs for future wireless devices are illustrated

Compact Models and Measurement Techniques for High-Speed Interconnects Rohit Sharma, Tapas Chakravarty, 2012-02-17 Compact Models and Measurement Techniques for High Speed Interconnects provides detailed analysis of issues related to high speed interconnects from the perspective of modeling approaches and measurement techniques Particular focus is laid on the unified approach variational method combined with the transverse transmission line technique to develop efficient compact models for planar interconnects This book will give a qualitative summary of the various reported modeling techniques and approaches and will help researchers and graduate students with deeper insights into interconnect models in particular and interconnect in general Time domain and frequency domain measurement techniques and simulation methodology are also explained in this
