The Civic Organization and the Digital Citizen Chris Wells,2015-06-16 The powerful potential of digital media to engage citizens in political actions has now crossed our news screens many times But scholarly focus has tended to be on networked anti institutional forms of collective action to the neglect of advocacy and service organizations This book investigates the changing fortunes of the citizen civil society relationship by exploring how social changes and innovations in communication technology are transforming the information expectations and preferences of many citizens especially young citizens In doing so it is the first work to bring together theories of civic identity change with research on civic organizations Specifically it argues that a shift in information styles may help to explain the disjuncture felt by many young people when it comes to institutional participation and politics The book theorizes two paradigms of information style a dutiful style which was rooted in the society communication system and citizen norms of the modern era and an actualizing style which constitutes the set of information practices and expectations of the young citizens of late modernity for whom interactive digital media are the norm Hypothesizing that civil society institutions have difficulty adapting to the norms and practices of the actualizing information style two empirical studies apply the dutiful actualizing framework to innovative content analyses of organizations online communications on their websites and through Facebook

Results demonstrate that with intriguing exceptions most major civil society organizations use digital media more in line with dutiful information norms than actualizing ones they tend to broadcast strategic messages to an audience of receivers rather than encouraging participation or exchange among an active set of participants The book concludes with a discussion of the tensions inherent in bureaucratic organizations trying to adapt to an actualizing information style and recommendations for how they may more successfully do so

The Liberal Media Industrial Complex Mark Dice,2019-11-12 The media used to mean television radio newspapers and magazines but today it largely involves social media which has swallowed up all of these other forms and is now controlled by a small group of Silicon Valley titans who decide what billions of people are able to see and hear online The convergence of old technology and new has centralized unimaginable power into the hands of a few gigantic corporations that now dictate how we communicate with each other and perceive the outside world Media analyst Mark Dice details how the rise of social media that tipped the balance of power regarding the production and distribution of information has also resulted in a massive backlash from those conspiring to regain the influence they once held Now conservatives are experiencing widespread censorship as the tech giants scramble to put the genie back in the bottle The liberal media has launched an information war against President Trump and his supporters and are using their monopolies to manipulate public opinion in order to further their aims of a socialist revolution
