Education serves as a cornerstone for gaining knowledge and taking initiative. However, despite efforts in disaster and climate risk education, DCRE, a gap often exists between awareness and meaningful action. To bridge this gap and promote a progression from awareness to empowerment, we offer the KIDA (Knowledge Interest Desire Action) framework. The foundation of this framework is a collaboration between schools, communities, and families, which calls for support from educational boards and local governments. Following international tragedies like the Turkey-Syria earthquake of 2023, as well as the ever-changing difficulties posed by climate change, DCRE has to be given priority immediately. Our book proposes a comprehensive strategy that includes governance, capacity building, education in schools, and the community and technology integration. Our insights, analyses, and practical policy suggestions are based on multidisciplinary research and worldwide case studies with the goal of strengthening resilience and cultivating a generation committed to sustainability. This book provides a comprehensive exploration of DCRE. It aims to prepare individuals and communities to face the challenges of a changing world head-on by improving knowledge and promoting preparedness.
