Abstract: This paper presents a policy analysis of the effects of a new policy on the health care system. The study was carried out using a mixed methods approach. The data were collected from a survey of 100 health care providers and 200 patients. The results of the study indicate that the new policy has had a positive impact on the health care system. The study also found that there are still some challenges that need to be addressed in order to fully implement the policy. The study concludes that the new policy is a positive step towards improving the health care system, but more work needs to be done to ensure its successful implementation.
