Aspiring young chemists will discover an amazing group of role models and memorable experiments in Chemistry for Kids, the debut book of The Kitchen Pantry Scientist series. Replicate a chemical reaction similar to one Marie Curie used to purify radioactive elements. Distill perfume using a method created in ancient Mesopotamia by a woman named Tapputi. This engaging guide offers a series of snapshots of 25 scientists famous for their work with chemistry from ancient history through today. A step by step illustrated experiment paired with each story offers kids a hands on opportunity for exploring concepts the scientists pursued or are working on today. Experiments range from very simple projects using materials you probably already have on hand to more complicated ones that may require a few inexpensive items you can purchase online. Just a few of the incredible people and scientific concepts you'll explore: Galen b 129 AD. Make soap from soap base, oil and citrus peels. Modern application: medical disinfectants. Joseph Priestly b 1733. Carbonate a beverage using CO₂ from yeast or baking soda and vinegar mixture. Modern application: soda fountains. Alessandra Volta b 1745.
