312 Things To Do with a Math Journal Denise Gaskins, 2022-03-14 Are you looking for new ways to help your children learn math? In a math journal, children explore their own ideas about numbers, shapes, and patterns through drawing or writing in response to a question. Journaling encourages students to develop a rich mathematical mindset. They begin to see connections and make sense of math concepts. They grow confident in their ability to think through new ideas. All they need is a piece of paper, a pencil, and a good prompt to launch their mathematical journey. *312 Things To Do with a Math Journal* includes number play, prompts, games, math art, story problems, mini essays, geometry investigations, brainteasers, number patterns, research projects, and much more. These activities work at any grade level and most can be enjoyed more than once. It doesn't matter whether your students are homeschooled or in a classroom, distance learning, or in person. Everyone can enjoy the experience of playing around with math. Early Reviews from My Journaling Beta Testers: We really enjoyed these. I remember doing pages and pages of dull equations with no creativity or puzzle thinking, but now as a homeschool mom, I'm actually enjoying math for the first time. My daughter's math skills have skyrocketed, and she always asks to start homeschool with math. Thank you for a great intro to Playful Math. All of the kids were excited about their journals. My oldest kept going without prompting and did several more pages on his own. We had a lot of fun doing your math prompts. We had never done any math journaling before, but we will certainly integrate this into our weekly routine from now on. Pick up a copy of *312 Things To Do with a Math Journal* and begin your family's math journaling adventure today.
