Iata Training Manual:

Glider Flight Instructor Manual Francesco Daniele Padovano, 2022-09-16 For decades and in the interests of greater flight safety Competence criteria have been introduced in professional training The results obtained in professional aviation are indisputable and the proposed new paradigm aims to increase the pilot's ability to resolve in particular unfamiliar situations There is no doubt that during soaring the conditions faced are as a general rule highly variable which requires the pilot to be highly adaptable However even though this flying technique is the one that requires the most resilience there is no single criterion in the development of training that would lead the future pilot to develop the necessary skills nor is there a single evaluation criterion that would determine a common standard From my experience in professional teaching in organisations such as CAE the experience as an EASA inspector and my own experience as a gliding instructor I wanted to propose a new way of teaching and above all of assessing a future glider pilot with COMPETENCE criteria in which the elements of CRM and TEM are always present together with the application of KSA In this text I hope that gliding instructors will find a tool for teaching their classes and a greater standardisation as a guide to develop their own Competence Based Training and assessment adapted at the local conditions and gliders The future is not white or black but an infinite scale of greys where different solutions could be proposed successfully By this the list of missions proposed is my personal view adapted to my programs but it does not pretend to be an absolute criterion Hope you will enjoy Happy landings Francesco Padovano

The Air Logistics Handbook Michael Sales, 2013-07-18 Why study air cargo Consider that this sector moves only 2% of the global volume of goods but a huge 35% by value reserved for the most costly and time sensitive products Air logistics is an economically and strategically important industry and a rich source of opportunity for graduating students and logistics or SCM professionals Get a head start in this vital part of your business with this comprehensive and lively overview It is the only book available to focus on the role of air freight in the global supply chain It includes a brief history the functions of the various players in the industry forwarders airlines airports government agencies regulations and restrictions terrorism management It details the benefits of air transport and weighs them against its considerable environmental impact to explore the question of its sustainability Finally it considers the future of the industry in a dynamic and increasingly globalised world Enriched throughout with real life case studies and contributions from global industry experts this is a ground level

introduction with a practical approach all the student or professional will need to get ahead in air logistics *Introduction to a Glider Flight Examiner Manual (FEM)* Francesco Daniele Padovano, 2022-10-20 Francesco Daniele Padovano is a gliding instructor with more than 15 000 flights in his experience along with training commercial pilots as a TKI at CAE He has been one of the main instructors of the national school in Spain and holds active SPL FI FI Acro and TMG ratings Among others he has laid the foundations of the gliding training programme in Colombia and has taught in the Argentinean army in their courses dedicated to drone pilot training He is currently developing a programme dedicated to children at risk of exclusion

with a motivational programme through gliding and collaborating with various vocational schools to complement the training with gliding He is the author of several publications in the aeronautical field El Manual del piloto de vuelo sin motor Manual del instructor de vuelo sin motor Meteorolog a para drones Glider Flight Instructor Manual development of the first period basic course based on the EASA SFCL regulation of march 2020 with the introduction of competence criteria This book wishes to propose a standard for SPL examiners based on CBTA Competence Training and Assessment and related mission sheet After the publication of the book Glider flight instructor manual with the introduction of the competence criteria CBTA this text is the natural evolution because if a competence based teaching system is proposed the evaluation at examination level of the candidates for obtaining the licences and ratings foreseen in the EASA regulation EU 2020 358 remains unresolved Therefore this text aims to provide a solution to the doubts that may arise for examiners when conducting an examination

Handbook of Research on Artificial Intelligence Applications in the Aviation and Aerospace Industries Shmelova, Tetiana, Sikirda, Yuliya, Sterenharz, Arnold, 2019-10-11 With the emergence of smart technology and automated systems in today s world artificial intelligence AI is being incorporated into an array of professions The aviation and aerospace industry specifically is a field that has seen the successful implementation of early stages of automation in daily flight operations through flight management systems and autopilot However the effectiveness of aviation systems and the provision of flight safety still depend primarily upon the reliability of aviation specialists and human decision making The Handbook of Research on Artificial Intelligence Applications in the Aviation and Aerospace Industries is a pivotal reference source that explores best practices for AI implementation in aviation to enhance security and the ability to learn improve and predict While highlighting topics such as computer aided design automated systems and human factors this publication explores the enhancement of global aviation security as well as the methods of modern information systems in the aeronautics industry This book is ideally designed for pilots scientists engineers aviation operators air crash investigators teachers academicians researchers and students seeking current research on the application of AI in the field of aviation
