

- Q.1] a) Explain why a government might introduce subsidies for food.
- b) Discuss the impacts, specifically focussing on the negative consequences that may arise from the government's decision to subsidise food.

Answers (Time : 50 min)

A subsidy is a form of economic aid by the government to economic sectors, firms, individuals or consumers to provide them aid. Food qualifies as a primary product i.e. a product created by cultivating raw materials that does not require a manufacturing process.

The United States of America provided a subsidy to producers of corn, which has been depicted in the diagram beside.

The law of demand states that there is a negative causal relationship between the price and quantity demanded of a product. However, since ~~there~~

the introduction of so a subsidy is a non price factor, ~~there~~ there is a rightward shift in the supply curve. Owing to the law of demand, the ~~demand~~ quantity demand expands to the point.

The government may want to introduce subsidies

The Personal and the Professional in Aid Work Anne-Meike Fechter,2016-03-16 This book considers how the personal and the professional dimensions are related and how they matter for aid work The contributions to this edited volume are based on the assumption that all actors are relevant in development including national and international aid workers A key question which the book explores is why the personal so often remains un acknowledged in development studies even though its salience for aid workers is well documented One possible reason is an implicit narrative of aid work as altruistic and self sacrificing which renders it inappropriate to devote much attention to the experiences of development professionals themselves In order to redress this this book critically considers the kind of difference they make and aims to understand how they respond to the challenges of their work The book explores their efficacy as human beings and employees with individual subjectivities social and cultural beliefs and practices and documents how these shape their involvement in development processes This book was published as a special issue of Third World Quarterly
