Saeed, Władysław Homenda, 2018-09-17 This book constitutes the proceedings of the 17th International Conference on Computer Information Systems and Industrial Management Applications CISIM 2018 held in Olomouc Czech Republic in September 2018. The 42 full papers presented together with 4 keynotes were carefully reviewed and selected from 69 submissions. The main topics covered by the chapters in this book are biometrics security systems multimedia classification and clustering and industrial management. Besides these, the reader will find interesting papers on computer information systems as applied to wireless networks computer graphics and intelligent systems. The papers are organized in the following topical sections: biometrics and pattern recognition applications computer information systems industrial management and other applications machine learning and high performance computing modelling and optimization and various aspects of computer security. International Conference on Computer Science and Software Engineering (CSSE 2014), 2014-11-03. CSSE2014 proceeding tends to collect the most up to date comprehensive and worldwide state of art knowledge on Computer Science and Software Engineering. All the accepted papers have been submitted to strict peer review by 2-4 expert referees and selected based on originality significance and clarity for the purpose of the conference. The conference program is extremely rich profound and featuring high impact presentations of selected papers and additional late breaking contributions. We sincerely hope that the conference would not only show the participants a broad overview of the latest research results on related fields but also provide them with a significant platform for academic connection and exchange. The Technical Program Committee members have been working very hard to meet the deadline of review. The final conference program consists of 126 papers divided into 4 sessions. **Computer and Cyber Security** Brij B.

Gupta, 2018-11-19 This is a monumental reference for the theory and practice of computer security. Comprehensive in scope, this text covers applied and practical elements theory and the reasons for the design of applications and security techniques. It covers both the management and the engineering issues of computer security. It provides excellent examples of ideas and mechanisms that demonstrate how disparate techniques and principles are combined in widely used systems. This book is acclaimed for its scope clear and lucid writing and its combination of formal and theoretical aspects with real systems technologies techniques and policies. *Theoretical Models of Learning and Literacy Development* Evan Ortlieb, 2014-06-13. *Theoretical Models of Literacy Development* highlights the latest theoretical advances in reading writing and multiliteracy development.
