Alternatives to Animal Use in Research, Testing, and Education ,1986 **Hearings, Reports and Prints of the Senate Committee on Agriculture and Forestry** United States. Congress. Senate. Committee on Agriculture and Forestry,1976

Herd Health Memo ,1986 *Green Is the New Red* Will Potter,2011-04-12 At a time when everyone is going green most people are unaware that the FBI is using anti terrorism resources to target environmentalists and animal rights activists The courts are being used to push conventional boundaries of what constitutes terrorism and to hit nonviolent activists with disproportionate sentences Some have faced terrorism charges for simply chalking slogans on the sidewalk Like the Red Scare this Green Scare is about fear and intimidation using a word eco terrorist to push a political agenda instill fear and silence dissent The animal rights and environmental movements directly threaten corporate profits every time activists encourage people to go vegan to stop driving to consume fewer resources and live simply Their boycotts are damaging and corporations and the politicians who represent them know it In many ways the Green Scare like the Red Scare can be seen as a culture war a war of values Will Potter outlines the political legal extra legal and public relations strategies that are being used to threaten even acts of nonviolent civil disobedience with the label of terrorism Here is a guided tour into the world of radical activism that introduces the real people behind the headlines and tells the story of how everyday people are being prevented from speaking up for what they believe in Potter a contributor to The Next Eco Warriors warns that the U S government is using post 9 11 anti terrorism resources to target environmentalists and animal right activists in some cases for doing nothing but speaking up Potter warns of the crumbling of the legal wall separating terrorist from dissident or undesirable and concludes his account with a call to action and a decry of the injustice that results in the terrorist label being put on those who threaten American corporate interests Alarming Publishers Weekly In this hard hitting debut journalist Potter likens the Justice Department targeting of environmentalists today to McCarthyism in the 1950s A shocking expos of judicial overreach Kirkus Reviews Starred review Will Potter is an award winning reporter who has written for publications including the Chicago Tribune the Dallas Morning News and Legal Affairs and has testified before the U S Congress about his reporting He is the creator of [www GreenIsTheNewRed com](http://www.GreenIsTheNewRed.com) where he blogs about the Green Scare

Scientific and Technical Aerospace Reports ,1985 **Poison Powder** Gregory S. Wilson,2023-04 In 1975 workers at Life Science Products a small makeshift pesticide factory in Hopewell Virginia became ill after exposure to Kepone the brand name for the pesticide chlordecone They made the poison under contract for a much larger Hopewell company Allied Chemical Life Science workers had been breathing in the dust for more than a year Ingestion of the chemical made their bodies seize and shake News of ill workers eventually led to the discovery of widespread environmental contamination of the nearby James River and the landscape of the small working class city Not only had Life Science dumped the chemical but so had Allied when the company manufactured it in the 1960s and early 1970s The resulting toxic impact was not only on the

city of Hopewell but also on the faraway fields where Kepone was used as an insecticide Aspects of this environmental tragedy are all too common corporate avarice ignorance and regulatory failure combined with race and geography to determine toxicity and shape the response But the Kepone story also contains some surprising medical legal and political moments amid the disaster With *Poison Powder* Gregory S Wilson explores the conditions that put the Kepone factory and the workers there in the first place and the effects of the poison on the people and natural world long after 1975 Although the manufacture and use of Kepone is now banned by the Environmental Protection Agency organochlorines have long half lives and these toxic compounds and their residues still remain in the environment Summary Report of Mission Acceleration Measurements for STS-60, SPACEHAB2, Launched 11 February 1994 ,1994 The State of American Agriculture United States. The Saturday Review of Politics, Literature, Science and Art ,1876 *An Age of Accountability* John L. Rury,2023-10-13 *An Age of Accountability* highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree *The English Catalogue*
