*Sustainability in high performance sport* Natalie Barker-Ruchti, Dean Barker, 2017-10-02 Success in high performance sport is highly valued in today's world with lucrative contracts sponsorship deals and opportunities for celebrity status balanced against substantial investments of time and energy and high chances of failure With pressure mounting on athletes and coaches to make the most of athletic investments the temptation to make health related or ethical compromises is growing *Sustainability in High Performance Sport* examines the pressures faced by coaches and athletes and considers how sustainable science can offer alternative pathways to sporting excellence By applying principles relating to carrying capacities complexity and uncertainty production and consumption and ethics this unique book provides new ways of thinking about both enduring and emerging challenges With a scope that includes themes such as coaching practices coach athlete relationships over training and injuries the development of sporting expertise and doping *Sustainability in High Performance Sport* is the most comprehensive exploration of sustainability in elite sport available It is an invaluable resource for anybody with an interest in achieving long term success in high performance sport This book was originally published as a special issue of *Reflective Practice*

*Handbook Of Climate Change And Agroecosystems: The Agricultural Model Intercomparison And Improvement Project (Agmip) Integrated Crop And Economic Assessments — Joint Publication With Asa, Cssa, And Sssa (In 2 Parts)* Daniel

Hillel, Cynthia Rosenzweig, 2015-02-13 Top agricultural scientists from around the world have taken up the challenge of sustainable agriculture with the specific focus on integrating agronomic climatological biophysical and socio economic perspectives and processes Every chapter of the Handbook contributes to addressing the growing food security challenges facing the world Foreword by Jeffrey Sachs Director of the Earth Institute at Columbia University Climate effects on agriculture are of increasing concern in both the scientific and policy communities because of the growing population and the greater uncertainty in the weather during growing seasons Changes in production are directly linked to variations in temperature and precipitation during the growing season and often to the offseason changes in weather because of soil water storage to replenish the soil profile This is not an isolated problem but one of worldwide interest because each country has concerns about their food security The Agricultural Model Intercomparison and Improvement Project AgMIP was developed to evaluate agricultural models and intercompare their ability to predict climate impacts In sub Saharan Africa and South Asia South America and East Asia AgMIP regional research teams RRTs are conducting integrated assessments to improve understanding of agricultural impacts of climate change including biophysical and economic impacts at national and regional scales Other AgMIP initiatives include global gridded modeling data and information technology IT tool development simulation of crop pests and diseases site based crop climate sensitivity studies and aggregation and scaling

**Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges**

Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives

[Africa in the Age of Globalisation](#) Assoc Prof Edward Shizha, Assoc Prof Lamine Diallo, 2015-04-28 This is a collection of bold and visionary scholarship that reveals an insightful exposition of re visioning African development from African perspectives It provides educators policy makers social workers non governmental agencies and development agencies with an interdisciplinary conceptual base that can effectively guide them in planning and

implementing programs for socio economic development in Africa The book provides up to date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa politics democracy education gender technology global relationships and the role of non governmental organisations The authors challenge the familiar paradigms in order to show how imperfectly if at all assumptions about globalisation and development theories have failed in their depictions and applications to Africa The scholars in this volume both inform and advocate for a re visioning of perceptions on Africa and how it navigates global processes *Defending Beef* Nicolette Hahn Niman,2014-10-31 For decades it has been nearly universal dogma among environmentalists and health advocates that cattle and beef are public enemy number one But is the matter really so clear cut Hardly argues environmental lawyer turned rancher Nicolette Hahn Niman in her new book *Defending Beef* The public has long been led to believe that livestock especially cattle erode soils pollute air and water damage riparian areas and decimate wildlife populations In *Defending Beef* Hahn Niman argues that cattle are not inherently bad for either the Earth or our own nutritional health In fact properly managed livestock play an essential role in maintaining grassland ecosystems by functioning as surrogates for herds of wild ruminants that once covered the globe Hahn Niman argues that dispersed grass fed small scale farms can and should become the basis for American food production replacing the factory farms that harm animals and the environment The author a longtime vegetarian goes on to dispel popular myths about how eating beef is bad for our bodies She methodically evaluates health claims made against beef demonstrating that such claims have proven false She shows how foods from cattle milk and meat particularly when raised entirely on grass are healthful extremely nutritious and an irreplaceable part of the world s food system Grounded in empirical scientific data and with living examples from around the world *Defending Beef* builds a comprehensive argument that cattle can help to build carbon sequestering soils to mitigate climate change enhance biodiversity help prevent desertification and provide invaluable nutrition *Defending Beef* is simultaneously a book about big ideas and the author s own personal tale she starts out as a skeptical vegetarian and eventually becomes an enthusiastic participant in environmentally sustainable ranching While no single book can definitively answer the thorny question of how to feed the Earth s growing population *Defending Beef* makes the case that whatever the world s future food system looks like cattle and beef can and must be part of the solution **Homeopathy and Autism Spectrum Disorder** Mike Andrews,2014-06-21 This book presents the clinical experiences of homeopaths from around the world who treat children and adults with ASD It explores the real clinical outcomes that are being achieved by homeopaths in practice including reduced aggression improved physical health and enhanced overall wellbeing *Older Citizens and End-of-Life Care* Malcolm Payne,2017-02-22 Older people are like younger people citizens in the communities of the nations in which they live This book sees ageing as a life journey that incorporates a process of citizenizing in which people build their identity as part of their family and community But the social experience of illness frailty disability and reaching the end of life may de

citizen older people by devaluing the social identity that comes from continuing social engagement We de citizen older people by emphasizing dependence on services and their cost to public expenditure instead of valuing the interdependence of participation and mutual respect This book argues that older people retain full citizenship for the whole of their lives up to the moment of death but what does this mean for health and social care In this groundbreaking book Malcolm Payne argues that social work with older people must build re citizenizing practice strategies to value both the common and the special aspects of the citizenship of older people Current models of social care and social work create dependency rather than relying on values of participative interdependence The failure to recognize the end of life as a crucial element in all social care and social work for older people means that the lessons learned in providing palliative and end of life care in healthcare have not been transferred to social care and the priorities of end of life care have not been adequately encompassed in social work with older people

Food Democracy Sue Booth, John Coveney, 2015-02-19 This book explores the links between food and democracy It addresses how democratic principles can be used to shape our food system and takes a practical how to approach to using democratic processes to regain control of the food we eat It also highlights what food democracy looks like on the ground and how individuals communities and societies can be empowered to access cook and eat healthy food in ways that are sustainable Food democracy as a concept is a social movement based on the idea that people can and should be able to actively participate in shaping the food system rather than being passive spectators The book is useful for university and advanced TAFE courses that cover topics examining food in health sciences social sciences and other areas of study It is also relevant to health practitioners nutritionists food advocates policy makers and others with a keen interest in exploring an alternative to the industrial food system known as Big Food

*People, Planet and Profit* Samuel O. Idowu, Abubakar S. Kasum, 2016-05-13 It is no longer the case that it s only society which benefits from CSR actions A corporation actually helps itself when operating sustainably and does well because of its triple bottom line actions The editors of People Planet and Profit believe that whilst Corporate Social Responsibility is by now a familiar concept to academics or practitioners insufficient attention has been paid to the end product of CSR in practice which they define in terms of social and economic developmental effect The contributions in this edited volume explain the developmental aspect of CSR from a conceptual perspective and provide empirical evidence of the impact of CSR delivery on stakeholders in different corners of the World The emphasis is on what corporations take from and give back to their stakeholders whilst trying to behave in a corporately responsible fashion Stakeholders including employees customers host communities governments and NGOs have diverse interests and expectations of CSR This gives rise to questions about whether the activities corporations support are the ones today s stakeholders need whether the CSR programmes being delivered are adequate and about the relationship between the corporations view of what constitutes CSR and that of the supposed beneficiaries This book offers thoughtful answers to these questions and assesses the outcomes of corporate activities both in developed and developing countries and regions in

terms of economic progress and social and political advancement      *Genetic Discrimination* Gerard Quinn, Aisling de Paor, Peter Blanck, 2014-11-20 As genetic technologies advance genetic testing may well offer the prospect of detecting the onset of future disabilities Some research also forwards that certain behavioural profiles may have a strong genetic basis such as the determination to succeed or the propensity for risk taking As this technology becomes more prevalent there is a danger that genetic information may be misused by third parties and that particular genetic profiles may be discriminated against by employers by providers of social goods and services such as insurance companies and even by educational facilities This book explores the different forms and potential uses of genetic testing Drawing together leading experts in disability law bioethics health law and a range of related fields it highlights the ethical and legal challenges arising as a result of emerging and rapidly advancing genetic science On examining transatlantic perspectives on the matter chapters in the book ask whether the US Genetic Information Nondiscrimination Act GINA is proving to be an effective tool in addressing the issue of genetic discrimination and alleviating fears of discrimination The book also reviews what insights may be gained from GINA within employment and health insurance contexts and asks how the UN Convention on the Rights of Persons with Disabilities CRPD may impact similar debates within the European Union The book focuses particularly on the legislative and policy framework in the European Union with an emphasis on the gaps in protection and the scope for specific legislative action in this area This book will be of great interest to scholars and students of discrimination law bioethics and disability law and will be of considerable use to legal practitioners medical practitioners and policy makers in this area      *21st Century Homestead: Urban Agriculture* Douglas Waterford, 2015-02-21 21st Century Homestead Urban Agriculture contains everything you need to stay up to date on urban agriculture      **Routledge Handbook of Sustainability and Fashion** Kate Fletcher, Mathilda Tham, 2014-08-21 The clothing industry employs 25 million people globally contributing to many livelihoods and the prosperity of communities to women's independence and the establishment of significant infrastructures in poorer countries Yet the fashion industry is also a significant contributor to the degradation of natural systems with the associated environmental footprint of clothing high in comparison with other products Routledge Handbook of Sustainability and Fashion recognizes the complexity of aligning fashion with sustainability It explores fashion and sustainability at the levels of products processes and paradigms and takes a truly multi disciplinary approach to critically question and suggest creative responses to issues of Fashion in a post growth society Fashion diversity and equity Fashion fluidity and balance across natural social and economic systems This handbook is a unique resource for a wide range of scholars and students in the social sciences arts and humanities interested in sustainability and fashion      *Life and Death in Early Modern Philosophy* Susan James, 2021 This book explores the breadth of philosophical interest in life and death during the early modern period It connects debates in philosophy with the life sciences linking the study of organisms to the practical aspect of philosophy and reminding us that that philosophers were concerned with learning how to live and how to die

*Synthesizing Hope* Anne Pollock, 2019-05-08 *Synthesizing Hope* opens up the material and social world of pharmaceuticals by focusing on an unexpected place iThemba Pharmaceuticals Founded in 2009 with a name taken from the Zulu word for hope the small South African startup with an elite international scientific board was tasked with drug discovery for tuberculosis HIV and malaria Anne Pollock uses this company as an entry point for exploring how the location of scientific knowledge production matters not only for the raw materials manufacture licensing and distribution of pharmaceuticals but also for the making of basic scientific knowledge Consideration of this case exposes the limitations of global health frameworks that implicitly posit rich countries as the only sites of knowledge production Analysis of iThemba identifies the problems inherent in global north south divides at the same time as it highlights what is at stake in who makes knowledge and where It also provides a concrete example for consideration of the contexts and practices of postcolonial science its constraints and its promise *Synthesizing Hope* explores the many legacies that create conditions of possibility for South African drug discovery especially the specific form of settler colonialism characterized by apartheid and resource extraction Paying attention to the infrastructures and laboratory processes of drug discovery underscores the materiality of pharmaceuticals from the perspective of their makers and tracing the intellectual and material infrastructures of South African drug discovery contributes new insights about larger social political and economic orders

*Phenomenology of Community Activism* Nora Amath, 2015-12-01 *The Phenomenology of Community Activism* explores how MCSOs have responded to the challenges of the Australian socio political context the perceived impact of these experiences and how Islam is manifested within the contexts of these experiences In contrast to much publicised jihadist and radical groups MCSOs are far more representative of Muslim communities and integral to the long term position of Islam in Australia This book offers researchers policy makers and those engaged in community development a rich understanding of Muslim community building engagement and agency This book reveals what will be surprising to some that there are many and varied MCSOs in Australia that in many ways they are similar to other civil society organisations serve similar purposes and encounter similar issues This is a very important datum to stand against the prejudices about Muslims and their organisations Professor Emeritus Gary Bouma Emeritus Professor of Sociology at Monash University UNESCO Chair in Intercultural and Interreligious Relations Asia Pacific Islamic Studies Series Volume 19

**21st-Century Statecraft** Nayef Al-Rodhan, 2022-07-28 From civilisational frontier risks associated with new challenges like disruptive technologies to the shifting nature of great power conflicts and subversion the 21st century requires a new approach to statecraft In 21st Century Statecraft Professor Nayef Al Rodhan proposes five innovative statecraft concepts He makes the case for a new method of geopolitical analysis called meta geopolitics and for dignity based governance He shows how in an interdependent and interconnected world traditional thinking must move beyond zero sum games and focus on multi sum and symbiotic realist interstate relations This requires a new paradigm of global security premised on five dimensions of security and a new

concept of power just power which highlights the centrality of justice to state interests These concepts enable states to balance competing interests and work towards what the author calls reconciliation statecraft Throughout Professor Al Rodhan brings his philosophical and neuroscientific expertise to bear providing a practical model for conducting statecraft in a sustainable way
