

(Math 1) Semester 1 Final Review Notes

To accompany your Semester 1 Final Practice Problems

Reminder: You are allowed one 3" x 5" notecard during the final. I recommend putting down any formulas that you find tricky and perhaps procedures that you have a hard time remembering.

Module 1, Topic 1 (Quantities and Relationships) Review Notes

Independent and Dependent Quantities:

- **Independent Quantity**—input; x-values; the quantity that the dependent quantity depends upon is the independent quantity. Example: In the relationship between driving time and distance traveled, driving time is the independent quantity, because it does not depend on any other quantity
- **Dependent Quantity**—output; y-values; when one quantity depends on another in a problem situation, it is the dependent quantity. Example: In the relationship between driving time and distance traveled, distance is the dependent quantity, because distance depends on the driving time.
