1. Module 1: Scientific Technologies

Scientific Methods

- Describe the scientific method (experiment) to test the process of science to solve problems. Scientific method is the process of asking, and answering, scientific questions that generate, test a prediction, draw a conclusion and then make a conclusion.
- Complete the following chart by providing a definition and example for each component of the scientific method.

Term	Definition	Example
Observation	Noticing things, gathering about the question	We observe that the same water (in the parking lot) never changes to the state they were then, always.
Question	A question about the natural world that we want to know	How can we keep parked from melting water in the parking lot?
Hypothesis	A prediction about the natural or real question	If that's the case, then there's a reason that, there will be less melting ice.
Experiment	Test an idea and report	We have to make those are the same with different.
