Technology Education Clare Benson,Julie Lunt,2011-11-16 This international handbook offers an in depth study of the development of primary Technology or Design and Technology education worldwide It is unique in that it focuses on the way in which the building blocks for this subject have been established providing much needed research and information for those involved with secondary education and beyond to draw on The inclusion of Technology education into primary curricula has gathered momentum for the last two decades as its importance and relevance to children s lives has been realised by educators This handbook offers a detailed insight into the many and varied ways in which countries have incorporated the subject into children s primary school experiences and issues that have arisen during its implementation The authors all work

in the field of primary technology education and have been actively involved in curriculum development and research in their own countries. The first part of the book is devoted to the introduction, the development and implementation of Technology education into the primary curricula of countries worldwide. Reasons for this movement, successes and barriers to development are discussed, and speculation about the future of Technology education is reflected upon. The second part of the book relates to issues that have arisen as the subject has grown over the last twenty years, and consideration needs to be given to these if future successes are to be achieved. Classroom practice, including designing and ICT teacher education, enterprise sustainability and indigenous technology, are all reflected upon and support the notion of technology as a valued and valuable part of the primary curriculum. This book should be of interest to undergraduate and graduate students, practitioners, researchers, curriculum developers, policy makers and professional development providers who are involved with and have an interest in primary technology education worldwide.

The CAPRISA Clinical Trials: HIV Treatment and Prevention Quarraisha Abdool Karim, Salim S. Abdool Karim, Cheryl Baxter, 2017-01-20. Since its inception 14 years ago, CAPRISA has conducted numerous clinical studies that have influenced international TB/HIV treatment guidelines as well as HIV prevention through innovations in the microbicide and vaccine fields. This book provides a historical account of how each of CAPRISA's high impact studies was created, developed, implemented, analysed and communicated. In doing so, the reader is taken on a journey that provides glimpses into the genesis of research ideas and how this ultimately leads to a range of HIV prevention and treatment studies that have impacted the global response to the HIV and TB epidemics. Comprised of 5 sections, the book details the following: HIV epidemic in South Africa and the establishment of a research centre to undertake clinical, epidemiological and laboratory research on HIV; CAPRISA's clinical trials on HIV and HSV-2 prevention; These studies investigated the impact of tenofovir gel as topical antiretroviral pre-exposure prophylaxis (PrEP); implementation of topical PrEP through family planning clinics; conditional cash incentives for HIV prevention; HIV vaccines and passive immunisation with broadly neutralising antibodies; CAPRISA's research on the treatment of HIV and TB co-infection; A review of the major scientific findings from the CAPRISA studies on acute infection and genital mucosal immunology; Essential support activities for the conduct of clinical trials, including research laboratories and pharmacies, as well as establishing effective communication and sustainable structures for community engagement to maintain effective and respectful partnerships with participating communities. The book concludes with a chapter about the challenges facing future HIV prevention and treatment trials. The CAPRISA Clinical Trials: HIV Treatment and Prevention is a resource for undergraduate and postgraduate students, health care providers, doctors, decision makers and researchers who are seeking guidance and insights on clinical trials, their creation, conduct and impact.
