Shi,2023-12-15 Two oversimplified narratives have long dominated news reports and academic studies of China's Internet  
one lauding its potentials to boost commerce the other bemoaning state control and measures against the forces of political  
transformations This bifurcation obscures the complexity of the dynamic forces operating on the Chinese Internet and the  
diversity of Internet related phenomena China and the Internet analyzes how Chinese activists NGOs and government offices  
have used the Internet to fight rural malnutrition the digital divide the COVID 19 pandemic and other urgent problems  
affecting millions of people It presents five theoretically informed case studies of how new media have been used in  
interventions for development and social change including how activists battled against COVID 19 In addition this book  
applies a Communication for Development approach to examine the use and impact of China's Internet Although it is widely  
used internationally in Internet studies Communication for Development has not been rigorously applied in studies of China's  
Internet This approach offers a new perspective to examine the Internet and related phenomena in Chinese society
