

Performing Calculations Using Exponents and Scientific Notation

The process of writing a number using scientific notation involves:

1. Moving the decimal point so that exactly one non-zero digit is left of the decimal point.

Example: 576.83 is written as 5.7683

Example: 0.00245 is written as 2.45

2. Counting the number of places the decimal was moved and using the number to determine an exponent for 10.

- a. If the original number were more than 1, the exponent is positive.

Example: $576.83 = 5.7683 \cdot 10^2$

- b. If the original number were less than 1, the exponent is negative.

Example: $0.00245 = 2.45 \cdot 10^{-3}$

Example:

$$65,000 \cdot 500 = \underline{\hspace{2cm}}$$

A process for answering correctly could be:

Begin by writing each number in scientific notation.

Group the numbers and the powers of ten.

Multiply each.

$$\begin{aligned} 65,000 \cdot 500 \\ (6.5 \cdot 10^4) \cdot (5.0 \cdot 10^2) \\ (6.5 \cdot 5.0) \cdot (10^4 \cdot 10^2) \\ 32.5 \cdot 10^6 \end{aligned}$$

Example:

$$\frac{1,050}{0.35} = \underline{\hspace{2cm}}$$

A process for answering correctly could be:

Begin by writing each number in scientific notation.

Group the numbers and the powers of ten.

Divide and simplify.

$$\begin{aligned} \frac{1,050}{0.35} \\ \frac{1.050 \cdot 10^3}{3.5 \cdot 10^{-1}} \\ \frac{1.050}{3.5} \cdot \frac{10^3}{10^{-1}} \\ 0.3 \cdot 10^4 \\ 3 \cdot 10^3 \end{aligned}$$

Literacy in the Disciplines , *TEXT BOOK OF PHARMACEUTICAL ENGINEERING* Prof. (Dr.) Mukesh Chandra Sharma, Dr. Ramisetty Sunitha, Dr. Sonu Sharma, Dr. Mayank Choubey, Dr. Hiranmoy Parya,2025-05-12 The Text Book of Pharmaceutical Engineering is a comprehensive guide

tailored to provide students and professionals with a thorough understanding of the essential principles and practices within pharmaceutical process engineering. It covers a wide range of foundational topics beginning with the flow of fluids where key devices such as manometers, orifice meters and Venturimeters are discussed alongside critical concepts like Bernoulli's theorem and Reynolds number. The book then transitions into size reduction detailing the mechanisms, laws and machinery including hammer mills, ball mills and fluid energy mills with a balanced focus on their construction, uses and operational advantages and limitations. Following this it delves into size separation offering insights into equipment like cyclone separators, sieve shakers and elutriation tanks reinforcing practical understanding with theoretical frameworks. The heat transfer section explores conduction, convection and radiation backed by Fourier's law and discussions on heat exchangers. In the evaporation chapter a variety of evaporators such as climbing film and multiple effect systems are thoroughly analyzed. The section on distillation introduces several forms from simple to molecular distillation each elaborated with principles and methodologies. The drying chapter is equally robust featuring tray dryers, vacuum dryers and freeze dryers emphasizing the rate of drying and moisture content dynamics. Mixing is covered with an in depth look at blending equipment for solids, liquids and semisolids highlighting mixers like ribbon blenders and Silverson emulsifiers. The filtration section addresses both theory and practical aspects focusing on various filters such as plate frame and rotary drum types. Centrifugation is presented with technical clarity detailing devices like perforated basket and super centrifuges. The final chapter discusses materials used in pharmaceutical plant construction alongside an analysis of corrosion, its types and prevention strategies encompassing metals and nonmetals. Overall this textbook stands as a critical resource that bridges theoretical knowledge with real world pharmaceutical manufacturing applications.

Cultural Evolution Alex Mesoudi, 2011-07-30 Charles Darwin changed the course of scientific thinking by showing how evolution accounts for the stunning diversity and biological complexity of life on earth. Recently there has also been increased interest in the social sciences in how Darwinian theory can explain human culture. Covering a wide range of topics including fads, public policy, the spread of religion and herd behavior in markets, Alex Mesoudi shows that human culture is itself an evolutionary process that exhibits the key Darwinian mechanisms of variation, competition and inheritance. This cross disciplinary volume focuses on the ways cultural phenomena can be studied scientifically from theoretical modeling to lab experiments, archaeological fieldwork to ethnographic studies and shows how apparently disparate methods can complement one another to the mutual benefit of the various social science disciplines. Along the way the book reveals how new insights arise from looking at culture from an evolutionary angle. *Cultural Evolution* provides a thought provoking argument that Darwinian evolutionary theory can both unify different branches of inquiry and enhance understanding of human behavior.

The Healthy Ancestor Juliet McMullin, 2016-06-16 Native Americans researchers increasingly worry are disproportionately victims of epidemics and poor health because they fail to seek medical care, are non compliant patients or lack immunity enjoyed by the mainstream population. Challenging this

dominant approach to indigenous health Juliet McMullin shows how it masks more fundamental inequalities that become literally embodied in Native Americans shifting blame from unequal social relations to biology individual behavior and cultural or personal deficiencies Weaving a complex story of Native Hawaiian health in its historical political and cultural context she shows how traditional practices that integrated relationships of caring for the land the body and the ancestors are being revitalized both on the islands and in the indigenous diaspora For the fields of medical anthropology public health nursing epidemiology and indigenous studies McMullin's important book offers models for more effective and culturally appropriate approaches to building healthy communities
