**Public Works Manual** ,1995      Resource-Aware Data Fusion Algorithms for Wireless Sensor Networks Ahmed Abdelgawad, Magdy Bayoumi, 2012-02-15 This book introduces resource aware data fusion algorithms to gather and combine data from multiple sources e.g. sensors in order to achieve inferences. These techniques can be used in centralized and distributed systems to overcome sensor failure, technological limitation and spatial and temporal coverage problems. The algorithms described in this book are evaluated with simulation and experimental results to show they will maintain data integrity and make data useful and informative. Describes techniques to overcome real problems posed by wireless sensor networks deployed in circumstances that might interfere with measurements provided such as strong variations of pressure, temperature, radiation and electromagnetic noise. Uses simulation and experimental results to evaluate algorithms presented and includes real test bed. Includes case study implementing data fusion algorithms on a remote monitoring framework for sand production in oil pipelines.
