the shaded area

2. Which has a greater total: potential number of mice? Why?

the one given more potential because the one more offspring produced per

3. What is carrying capacity?

environment can sustain a given large population of organisms before

4. What are the two types of limiting factors and how do they differ?

density dependent (competition, disease, predation, stress and density independent factors (weather, hurricanes, forest fires, etc.) density is the only limiting population is independent of density

5. Which limiting factors inhibit population a population, what happens to the growth graph?

density dependent factors have greater influence on low population density (density dependent factors) independent population (density independent factors) (density independent factors)

6. Match the following terms to the correct description.

_____ mortality

a. death rate

_____ fecundity

b. predicted length of survival

_____ fertility

c. ability to reproduce

_____ fecundity

d. birth of new individuals

_____ life expectancy
