How To Escape Excelsior Editions:

How to Escape Crispin Sartwell, 2014-08-13 Passionate and rollicking personal and intellectual essays by philosopher Crispin Sartwell. Music critic and syndicated columnist Crispin Sartwell has forged a distinctive and fiercely original identity over the years as a cultural commentator. In books about anarchism, art and politics, Native American and African American thought and culture, Eastern spirituality and American transcendentalism, Sartwell has relentlessly insisted on an ethos rooted in unadorned honesty with oneself and a healthy skepticism of others. This volume of selected popular writings combines music and art criticism with personal memoir about addiction and rebellion as well as cultural commentary on race, sexuality, cynicism and the meaning of life. Crispin Sartwell deserves to be recognized as the heir to a distinctively American intellectual legacy. Like the American cynics he loves, Twain, Bierce, Menckens, he is fiercely individualistic, deeply antiauthoritarian and slavishly aligned with no creed or academic discipline. He uses his significant erudition not to escape the ordinary or himself but rather to let loose riches of insight, suffering and beauty through a relentless examination of life, culture and reality. Sartwell is also in my opinion the best philosophical prose stylist of his generation. His writing is crystalline, vivid and intoxicating, an uncontrollable substance. And though Sartwell swaggers, provokes and sometimes infuriates, he does so with a tacit humility and self-scrutiny which empowers readers to follow his example and convert their own rage into beauty. Elizabeth Walden, Bryant University. Crispin Sartwell is the most important philosophical voice of his generation. He has risen into the public consciousness in the last two decades due to his controversial views on social, political and cultural subjects. Through television appearances, journalism and blogging along with his numerous scholarly books, he has made a reputation as a thinker of serious thoughts. Yet there is a lightness to his world that is irreverent, fun and entertaining. These essays reflect some of his best writing from the past fifteen years. They are highly readable but they are also profound reflections on the subjects that will draw many of us into deeper ponderings about the meaning of life or more to the point, the meaning of our lives. Simon Critchley, coeditor of *The Stone Reader*. In *What Philosophy Can Do*, Gary Gutting takes a philosopher's scalpel to modern life's biggest questions and the most powerful forces in our society: politics, science, religion, education and capitalism. Along the way, he introduces readers to powerful philosophical tools, from inductive and deductive logic to the Principle of Charity, which they can use to make better sense of current debates. Interweaving his discussion of contemporary issues with philosophical concepts from Aristotle to Michel Foucault and John Rawls, Gutting shows how philosophy can enrich public discussions about our most urgent issues. Oppenheimer,2016-02-02 Takes a look at the lives of six political figures who started their political journey on the Left and moved increasingly to the Right **Reimagining Therapy through Social Contextual Analyses** Bernard

Guerin,2022-07-29 This book attempts to shake up the current complacency around therapy and mental health behaviours by putting therapy fully into context using Social Contextual Analysis showing how changes to our social discursive and societal environments rather than changes to an individual's mind will reduce suffering from the mental health behaviours Guerin challenges many assumptions about both current therapy and psychology and offers alternative approaches synthesized from sociology social anthropology sociolinguistics and elsewhere The book provides a way of addressing the mental health behaviours including actions talking thinking and emotions by taking people's external life situations into account and not relying on an imagined internal source Guerin describes the broad contexts for current Western therapies referring to social discursive cultural societal and economic contexts and suggests that we need to research the components of therapies and stop treating therapies as units He reframes different types of therapy away from their abstract jargons offering an alternative approach grounded in our real social worlds aligning with new thinking that challenges the traditional methods of therapy and also providing a better framework for rethinking psychology itself The book ultimately suggests more emphasis should be put on mental health behaviours as arising from social issues including the modern contexts of extreme capitalism excessive bureaucracy weakened discursive communities and changing forms of social relationships Practical guidelines are provided for building the reimagined therapies into clinics and institutions where labelling and pathologizing the mental health behaviours will no longer be needed By putting mental health behaviours and therapy into a naturalistic or ecological social sciences framework this book will be practical and fascinating reading for professional therapists counsellors social workers and mental health nurses as well as academics interested in psychology and the social sciences more generally
