Teach Like the Mind Learns Victor P. Maiorana, 2017-02-08 This book provides the profession with across discipline illustrations of classroom assignments that utilize and develop the mind's innate but informal gift to think critically. By applying the universal gift formally, faculty for the first time can lead all students to think, read, listen, write, speak, and observe critically while concurrently comprehending new and revisited subject matter. This work is for use as a textbook in teacher preparation and professional development programs. Teacher educators, teacher candidates, school and college faculty, and professional developers are shown how to explicitly apply mind grammar to the design of classroom assignments. Disadvantaged English language learners, general and special education students will all have their innate abilities to reason critically nurtured and developed. *Teach Like the Mind Learns* along with *Fixing Instruction* and *Preparation for Critical Instruction* provides the teaching profession with ownership as with doctors, engineers, and lawyers of its language standards preparation and practice. The merging of subject matter instruction with the development of critical language abilities is now a reality for the teaching profession.
