**How to Think Like an Officer** Reed Bonadonna, 2020-09-01 The U S military invests heavily in time and resources to train its officers to be leaders in the broadest sense forming them not only in military art and science strategy tactics command etc but also in humanistic knowledge character and values as well as how to apply this education on a lightning fast battlefield or within an inertially slow bureaucracy The military develops its leaders at the service academies and in ROTC programs through very specific but also broad and deep education a way of thinking that also has wide application in the civilian world not only in various professional fields that need leaders and thinkers but also among

military history enthusiasts who want to understand how officers have thought across time and among American citizens who want and really need to understand how our military leaders think how they advise presidents how they lead on the battlefield In a genre busting book that spans Stackpole s two longstanding military programs reference and history Reed Bonadonna describes how officers think how they ought to think how they develop their skills and how they can improve these skills as well as how average civilians and citizens can learn from the example of military officers and their program of education Bonadonna draws from military history from military arts and science from literature and science and more to show how officers develop their critical thinking and problem solving skills A military officer is often called upon to be not only fighter and leader but also negotiator organizer planner and preparer teacher writer scientist and advisor and needs broad learning This is a deeply learned and insightful book one that cites Lincoln Grant Patton Eisenhower Marshall and Churchill as easily as Sun Tzu and Clausewitz not to mention Homer Plato Joseph Conrad Henry James Wilfred Owen Robert Graves George Orwell Ludwig Wittgenstein Joseph Heller Phil Klay and even Jane Austen The book is descriptive as well as prescriptive and should find eager readers inside the military where officers take seriously their professional education and their professional reading lists as well as outside where many look to the military to military reading lists and to military history to glean lessons for life and work
