

CONTROLS AND THEIR FUNCTIONS

① POWER/PHONES/SPEAKERS switch

A combined switch for power, headphones and speaker selection.

POWER OFF	Receiver off.
PHONES	Speakers cut off (headphones can be used).
A	To listen to speakers connected to the SPEAKERS A terminals.
B	To listen to speakers connected to the SPEAKERS B terminals.
A + B	To listen simultaneously to speakers connected to the A and B SPEAKERS terminals.

② PHONES jack

Insert a stereo headphone plug into this jack for private listening. The speakers are silenced when the SPEAKERS switch is set to PHONES position.

③ BASS and TREBLE controls

BASS control	Turning it clockwise increases low frequencies and counterclockwise decreases it.
TREBLE control	Turning it clockwise increases high frequencies and counterclockwise decreases it.

④ BALANCE control

This control adjusts unequal volume from any program source in right and left channels. The left channel is accentuated when this control is turned from center toward the left side, and conversely.

⑤ VOLUME control

This control adjusts simultaneously volumes in both channels (right and left). Set it to your own most satisfactory listening level.

⑥ LOUDNESS switch

This switch boosts bass and treble tones at low listening levels. Our ears have less sensitivity to low and high frequencies at low listening levels and this switch compensates for this deficiency. This switch should be off when listening at normal and high levels.

⑦ TAPE switch

Depress this switch when using a tape deck for tape playback, or when monitoring a tape during recording.

NOTE:

Except for tape playback, make sure it is in the "SOURCE" position.

⑧ SELECTOR switch

Switch positions and functions are as follows:

AM	To receive AM broadcast.
AUTO/MUTING	To receive both FM mono and stereo broadcasts. Automatic switching operates between FM mono and stereo broadcast. This position also silences the interstation noise on the FM band.
MONO	To receive FM mono broadcast.
PHONO	To operate a turntable connected to the PHONO jacks.
AUX	To select source connected to the AUX jacks.

⑨ TUNING knob

Select the desired AM or FM station while observing the SIGNAL and/or TUNING meters for optimum tuning.

⑩ FM STEREO indicator

With the SELECTOR switch set to AUTO/MUTING position, the STEREO indicator lights during an FM stereo broadcast reception. However, it does not light during an FM mono broadcast reception.

⑪ TUNING meter

This meter is used for precise tuning to the center of an FM channel. Turn the tuning knob until the meter pointer is in the center of the meter scale. This provides maximum separation and minimum distortion.

⑫ SIGNAL meter

This meter indicates signal strength for AM and FM. Maximum deflection indicates best receiving condition.
