Abstract: This is an authors' guide for the preparation of Proceedings of ICMDT 2015. Authors are required to use a *Microsoft Word template file* to produce fully formatted camera-ready manuscripts. The template provides predefined *Style* formats which allows the authors to easily set style and layout of necessary elements in their manuscripts.

Keywords: Mechanical engineering, Machine element, Actuator, Manufacturing, Design, Tribology.

1. Overview

Authors should prepare manuscripts in the form of *Microsoft WORD* documents, and convert them into *Adobe pdf file* format for submission. This document is a guideline for the preparation of the manuscripts for the Proceedings of ICMDT 2015 and doubles as a template for *Microsoft WORD*.

2. Format

Text should be within the dimensions shown on these pages; each column width should be 75 mm with 10 mm space between columns. Total width should be 160 mm. The left and right margins should be 25 mm, the upper margin should be 25 mm except on the first page, and the lower margin 30 mm. Upper margin for the first page should be 40 mm to provide space for the headers. The space is provided in the template. Use 10 pt Times New Roman font with 1.0 line spacing for body text. **The manuscript for the proceedings should not exceed 2 printed pages.**

2.1 Header and footer

Special header on the first page is predefined in this template. Other information such as page numbers should not be included in the header and footer region.

2.2 Paper Title and author(s)

Title should be centered on full width of the first page with spacing; one extra line from page top to title and one extra line from title to author(s). The font used for title is 14 pt boldface Times New Roman.

Author name(s) and affiliation(s) are also centered on full width of page using 12 pt Times New Roman by formatted using style "Contributor names". One extra line should be inserted between author name(s) and affiliation(s).

2.3 Abstract and Keywords

Start the paper with a short abstract using the style format "Abstract." Abstract should be less than 250 words. Provide Keywords on a separate line at the end of the abstract. Separate Abstract and Keywords with a single blank line.

2.4 Headings

First level headings are set to 10 pt boldface Times New Roman, and 2nd level headings are 10 pt Times New Roman. Both can be set by using style format included in this template: "section title" and "subsection title", respectively.

2.5 References

Reference number in the text should be enclosed in square brackets, for example, [1].

3. Mathematical expressions

All mathematical expressions should be included in the manuscript. Care should be taken to distinguish between capital and lowercase letters, between zero "0" and the letter "O", between the numerical "1" and the letter "l", etc. Mathematical expressions should fit into a single column when set in type. Equations that might extend beyond the width of one column (fractions that should not be broken or long expressions enclosed in parentheses) should be rephrased to go on two or more lines
