Beginner Tutorial - Assignment - 11/13

In group 2, create a function by assigning $f(x) := 2x^3 - 2x - a$.

In a cell below, assign the variable a the value 5 with $a := 5$.

Once functions and variables are assigned values with $:=$ they can be used elsewhere in the Canvas. Try evaluating the function with $f(1)$.

Precalculus with Calculus Previews: Expanded Volume Dennis G. Zill, Jacqueline M. Dewar, 2009-01-03

Precalculus with Calculus Previews Dennis Zill, Jacqueline Dewar, 2011-04-20 Building off the success of Zill and Dewar's popular Precalculus with Calculus Previews Fourth Edition the new Expanded Volume includes all the outstanding features and learning tools found in the original text while incorporating additional coverage that some courses may require. With a continued aim to keep the text complete yet concise the authors added three additional chapters making the text a clear choice for many mainstream courses. New chapters include Triangle Trigonometry Systems of Equations and Inequalities and Sequences and Series. This student friendly four color text offers numerous exercise sets and examples to aid in students learning and understanding and graphs and figures throughout serve to better illuminate key concepts. The exercise sets include engaging problems that focus on algebra graphing and function theory the sub text of so many calculus problems. The authors are careful to use the terminology of calculus in an informal and comprehensible way to facilitate the student's successful transition into future calculus courses. Encyclopedia of Computer Science and Technology Allen

Kent, James G. Williams, 1992-10-29 This comprehensive reference work provides immediate fingertip access to state of the art technology in nearly 700 self contained articles written by over 900 international authorities. Each article in the Encyclopedia features current developments and trends in computers software vendors and applications extensive bibliographies of leading figures in the field such as Samuel Alexander John von Neumann and Norbert Wiener and in depth analysis of future directions. Maple in Mathematics Education and Research Robert M. Corless, Jürgen Gerhard, Ilias S. Kotsireas, 2021-07-19 This book constitutes refereed proceedings of the 4th Maple Conference MC 2020 held in Waterloo Ontario Canada in November 2020. The 25 revised full papers and 3 short papers were carefully reviewed and selected out of 75 submissions one invited paper is also presented in the volume. The papers included in this book cover topics in education algorithms and applications of the mathematical software Maple. **Computerized Symbolic Manipulation in**

Mechanics Edwin Kreuzer, 1994-11-02 The aim of this book is to present important software tools basic concepts methods and highly sophisticated applications of computerized symbolic manipulation to mechanics problems. An overview about general purpose symbolic software is followed by general guidelines how to develop and implement high quality computer algebra code. The theoretical background including modeling techniques for mechanical systems is provided which allows for the computer aided generation of the symbolic equation of motion for multibody systems. It is shown how the governing equations for different types of problems in structural mechanics can be automatically derived and how to implement finite element techniques via computer algebra software. Perturbation methods as a very powerful approach for nonlinear problems are discussed in detail and are demonstrated for a number of applications. The applications covered in this book represent some of the most advanced topics in the rapidly growing field of research on symbolic computation. Intelligent Tutoring

Dynamical Systems with Applications using Maple™ Stephen Lynch, 2009-12-23 Since the first edition of this book was published in 2001 the algebraic computation package Maple has evolved from Maple V into Maple 13 Accordingly the second edition has been thoroughly updated and new material has been

added In this edition there are many more applications examples and exercises all with solutions and new chapters on neural networks and simulation have been added There are also new sections on perturbation methods normal forms Gröbner bases and chaos synchronization This book provides an introduction to the theory of dynamical systems with the aid of the Maple algebraic manipulation package It is written for both senior undergraduates and graduate students The first part of the book deals with continuous systems using ordinary differential equations Chapters 1–10 the second part is devoted to the study of discrete dynamical systems Chapters 11–15 and Chapters 16–18 deal with both continuous and discrete systems Chapter 19 lists examination type questions used by the author over many years one set to be used in a computer laboratory with access to Maple and the other set to be used without access to Maple Chapter 20 lists answers to all of the exercises given in the book It should be pointed out that dynamical systems theory is not limited to these topics but also encompasses partial differential equations integral and integro differential equations stochastic systems and time delay systems for instance References 1–5 given at the end of the Preface provide more information for the interested reader

This book delves into Maple 12 Edition Tutorial. Maple 12 Edition Tutorial is a vital topic that must be grasped by everyone, from students and scholars to the general public. The book will furnish comprehensive and in-depth insights into Maple 12 Edition Tutorial, encompassing both the fundamentals and more intricate discussions.
