#### Conclusion

From the specs table, we can see the Beigoo Arcard (TECU)AT&T Unite Pro is more advanced than the Mifi Liberate. The AT&T Unite Pro support [LTE cat.4](#) and it could achieve download speed up to 150Mbps. The WLAN feature is more advanced. The battery of Unite Pro is more powerful and there are two connections for an external antenna. When the AT&T Mifi Liberate was presented first time, it may be the most advanced, but now it's an old model and some technical features can't meet the requirements from end-users and the upgrading LTE networks. However, as a basic LTE mobile pocket WiFi, its price is very attractive now. If you just need a cheap LTE hotspot, it could be considerable, but if you concerns the LTE surfing speed and want more powerful features from a mobile hotspot, the AT&T Unite Pro should be considered.
