## **Military Skills And Development System 2016:**

*South Africa's Post-Apartheid Military* Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming, the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged, HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

Handbook of Research on Character and Leadership Development in Military Schools Ryan, Mark Patrick, Weekes, Timothy L., 2021-01-22 Military academies have served youth for more than a century with proud traditions of producing graduates who are scholars, leaders and athletes who adhere to a code of honor and ethical principles as they take the knowledge, skills and dispositions gained at those academies into higher education, the business world, military service, civic endeavors and the broader workforce. There is a current gap and need for research that explores the various components of a K-20 military school, college education and how those components successfully produce leaders of character for our military, civic, academic and business worlds both in the United States and abroad. The *Handbook of Research on Character and Leadership Development in Military Schools* synthesizes research on the impact of military academies by providing a singular compendium of current academic studies on the graduates of military academies and the communities of which they enter after graduation. The chapters will explore the academics, leadership, character development, citizenship, athletics and other dimensions of both global and national and both private and public military academies. This book is ideal for current leaders, staffs, governing board members and alumni of military academies both in the United States and internationally, along with policymakers, government officials, practitioners, researchers, academicians and students interested in the implications of character and leadership development on individuals enrolled in or graduated from military schools.

[Military Spending and Global Security](#) Jordi Calvo Rufanges, 2020-11-25 Global military expenditure reached an estimated 1 822 billion in 2018 and this book questions what that spending responds to and indeed what that entails in terms of global security The book draws from prior knowledge and research on military expenditure but introduces an all encompassing in depth and original analysis of military spending as a key and often overlooked factor of global instability delving into the present and future consequences of its perpetual growth as well as confronting the reasoning behind it The authors argue that increasing military expenditure is not the best response to the emergencies militarization itself has helped

create They assert that militarization is paradoxically both a cause of and a response to the grave challenges our society is facing The book explains why people are not well served by nation states when they continuously seek to out compete one another in the size and destructive powers of their militaries It discusses the scope of military spending around the world while explaining how militarism is linked with conflict and security threats and how military spending further prevents us from adequately dealing with global environmental problems like climate change A must read for scholars researchers and students from a wide range of disciplines It will also find an audience among professionals from the third sector and activists working on issues related to peace security and militarism as well as social and climate justice **Socio-Economic**
