Minorities Of Europeanization The New Others Of European Social Identity:

Minorities of Europeanization Hakan Ovunc Ongur, 2014-11-13 What are the societal effects of Europeanization How successful is the EU's project to create an overarching European identity representative of all its citizens transcending national boundaries and including those previously excluded as national minorities This study addresses these questions by adapting the Social Identity Theory's SIT concept of social identity to the discussions of European identity offering a novel approach that remedies previous definitional and ontological problems of the term The conceptualization of a European social identity is generated here to invite a reconsideration of conventional understandings of how minorities group identities are formed Presenting itself as a challenge to nations and nationality the European integration process has yet to achieve its supra national ideal falling instead into the trap of nationalizing those who are subsumed under the category of minorities in practice arguably because of a faulty theoretical understanding of the term The new Others of Europeanization have been chosen specifically to emphasize despite the EU's united in diversity rhetoric the marked lack of united destiny and common heritage of selected European nationals Among these new Others Russophones in the Baltic states the Roma people populations of the Western Balkans immigrants and guest workers and Muslims residing in European countries have all been excluded from Europe's new social identity Through in depth historical analysis this book aims to correct this problem providing both European studies and broader political science literatures with a new understanding of minorities that is more dynamic both in practice and theory

THE HISTORICAL FORMATION OF GERMANY'S EUROPEAN IDENTITY Dr. Melek Aylin Özoflu, 2024-06-17 The European integration process aimed to foster a sense of common European identity enhancing the European public's sense of belonging and identification with the European community This goal is vividly reflected in Jean Monnet's 1952 statement We are not bringing together states we are uniting people In this context forming a collective European identity has emerged as a process in the making boosted often by the symbols of solidarity such as common currency motto flag and anthem This book delves into the historical process of European identity formation in Germany presenting a unique case where its post war national identity was constructed hand in hand with the European identity resulting in relatively higher levels of identification compared to other member states While doing this it leverages the core principles of Social Identity Theory SIT to enlighten the temporal dimensions of identity i.e. past present and future reflecting upon the continuity within the Europeanization and EU-ization processes This book provides readers with a deeper understanding of the historical foundations of the European identity and its successful blossoming in Germany Its extensive literature review contributes significantly to European studies making it an essential read for scholars and enthusiasts alike

The Evolving Psyche of Law in Europe Magdalena Smieszek, 2021-06-04 The book applies an interdisciplinary analytical framework based on social psychology theories of inclusion and exclusion to a discussion of legal discourse and the development of legal frameworks in Europe concerning migrants asylum seekers refugees and European citizens It adopts a

psycho historical perspective to discuss the evolution of international and European law with regard to the rights of citizens and asylum seeking non citizens from the law s inception following the Second World War up to present day laws and policies The book reveals the embracing of a European identity based on human rights as the common feature in European treaties and institutions one that is focused on European citizens and has inclusionary objectives However a cognitive dissonance can also be found as this common identity making runs counter to national proclivities as well as securitized threat perception oriented perspectives that can produce exclusionary manifestations concerning persons seeking asylum In particular a view of inclusion and exclusion via legal categorizations of status as well as distributions of social and economic rights draws attention to the links between social psychology and international law What emerges in the analysis a process of creating value is present both at its psychological roots and the expressions of value in the law Fundamentally speaking the emergence of laws and policies that center on human beings and human dignity when understood from a psychological and emotion based perspective has the potential to transcend the dissonances identified

Narrating European Society Hans-Jörg Trenz,2016-03-21 Trenz introduces a sociological perspective on European integration by looking at different accounts of Europeanization as society building He observes how Europeanization unfolds in ongoing

practices and discourses through which social relations among the Europeans are redefined and re embedded The chapters describe how the project of European integration has been powerfully launched in postwar Europe as a normative venture that comprises polity and society building how this project became ingrained in every day life histories and experiences of the Europeans how this project became contested and confronted resistances and ultimately how it went through its most severe crisis A sociology of European integration is thus outlined along four main themes or narratives first the elite processes of identity construction and the framework of norms and ideas that carries such a construction together with notions of European identity EU citizenship etc second the socialization of European citizens processes of banal Europeanism and social transnationalism through everyday cross border exchanges third the mobilization of resistance and Euroskepticism as a fundamental and collectively mobilized opposition to processes of Europeanization and fourth the political sociology of crisis linked not only to financial turmoil but also more fundamentally to a legitimation crisis that affects Europe and the democratic nation state

Romania and the Quest for European Identity Cristian Cercel, 2019-03-15 Exploring the largely positive representations of Romanian Germans predominating in post 1989 Romanian society this book shows that the underlying reasons for German prestige are strongly connected with Romania's endeavors to become European The election in 2014 of Klaus Iohannis as Romania's president was hailed as evidence that the country chose a European future that Iohannis belonged to Romania's tiny German minority was also considered to have played a part in his success Cercel argues that representations of Germans in Romania descendants of twelfth century and eighteenth century colonists become actually a symbolic resource for asserting but also questioning Romania's European identity Such representations link Romania's much desired European belonging with German presence whilst German absence is interpreted as a sign of veering away from

Europe Investigating this case of discursive self colonization and this apparent symbolic embrace of the German Other in Romania the book offers a critical study of the discourses associated with Romania s postcommunist Europeanization to contribute a better understanding of contemporary West East relationships in the European context This fresh and insightful approach will interest postgraduates and scholars interested in Central Eastern and Southeastern Europe and in German minorities outside Germany It should also appeal to scholars of memory studies and those interested in the study of otherness in general
