Mpnp New Rquirnants 2015:

Political Handbook of the World 2015 Tom Lansford,2015-03-24 The Political Handbook of the World provides timely thorough and accurate political information with more in depth coverage of current political controversies than any other reference guide The updated 2015 edition will continue to be the most authoritative source for finding complete facts and analysis on each country s governmental and political makeup Compiling in one place more than 200 entries on countries and territories throughout the world this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system It also provides names of key ambassadors and international memberships of each country plus detailed profiles of more than 30 intergovernmental organizations and UN agencies And this annual update includes coverage of current events issues crises and controversies from the course of this year **Neoliberal Contentions**

Lois Harder,Catherine Kellogg,Steve Patten,2022-12-21 Since the 1980s neoliberalism has had a major impact on social life and in turn research in the social sciences Emerging from the crisis of the Keynesian welfare state neoliberalism describes a social transformation that has impacted relationships between citizens and the state consumers and the market and individuals and groups Neoliberal Contentions offers original essays that explore neoliberalism in its various guises It includes chapters on economic policy and restructuring resource extraction multiculturalism and equality migration and citizenship health reform housing policy and 2SLGBTQ communities Drawing on the work of influential Canadian political economist Janine Brodie the contributors use Brodie s scholarship as a springboard for their own distinct analyses of pressing political and social issues Acknowledging neoliberalism s crises failures and contradictions this collection contends with neoliberalism by diagnosing the present situating the phenomenon within a broader historical and political economic context and observing instances in which neoliberal rationality is reinforced as well as resisted *The Crisis of South*

African Foreign Policy Matthew Graham,2015-09-28 The emergence of a new democratic South Africa under Nelson Mandela was regarded as a high watermark for international ideals of human rights and democracy Much was expected of the ANC in power particularly that it would be able to translate its ideals into a coherent foreign policy for the African continent Yet its foreign policy since 1994 has been mired in accusations of incoherence contradiction and failure Here based on extensive archival research and interviews Matthew Graham offers new ways of interpreting South Africa s foreign policy by investigating the continuities and discontinuities of the ANC s international relations from exile to political power Charting the political intrigues during the country s transition from apartheid and the subsequent influences on Presidents Mandela and Mbeki *The Crisis of South African Foreign Policy* makes a vital contribution to our understanding of why post apartheid South Africa has failed to lead Africa on the world stage **Selected Studies in Biodiversity** Bülent Şen,Oscar

Grillo,2018-06-20 The present book offers an overall up to date overview of the biological diversity comprising many interesting chapters focussing on the different aspects of biodiversity Most of the chapters include findings of investigations

and observations on biodiversity whilst a few are based on statistically and theoretically derived information The book produced sufficient information on the occurrence and distribution of many plant and animal species or groups of organisms with environmental estimates from a wide variety of interesting terrestrial and aquatic habitats With 18 interesting and elaborately prepared chapters the present book would definitely be an ideal source of scientific information to the advanced students junior researchers scientists and a portion of the public involved in ecology and other research areas involving biodiversity studies It will also help to the development of the growing awareness of the close linkage between the conversation of biodiversity and economic development

Amnesty After Atrocity? Helena Cobban, 2015-11-17 A compelling read Richard J Goldstone former Chief Prosecutor of the UN tribunals for the former Yugoslavia and Rwanda A very important contribution Princeton N Lyman Council on Foreign Relations A powerful reminder that dealing with the legacy of wartime atrocities is not simply a matter of bringing perpetrators to justice It also means overcoming the divisions within the society and healing the victims Marina Ottaway Senior Associate Democracy and Rule of Law Project Carnegie Endowment for International Peace In *Amnesty after Atrocity* veteran journalist Helena Cobban examines the effectiveness of different ways of dealing with the aftermath of genocide and violence committed during intergroup conflicts She traveled to Rwanda Mozambique and South Africa to assess the various ways those nations tried to come to grips with their violent past from war crimes trials to truth commissions to outright amnesties for perpetrators She discovered that in terms of both moving forward and satisfying the needs of survivors war crimes trials are not the most effective path This book provides historical context and includes interviews with a cross section of people community leaders victims policymakers teachers rights activists and even some former abusers These first person accounts create a rich readable text and Cobban's overall conclusions will surprise many readers in the West

Quantum Information Processing with Finite Resources Marco Tomamichel, 2015-10-14 This book provides the reader with the mathematical framework required to fully explore the potential of small quantum information processing devices As decoherence will continue to limit their size it is essential to master the conceptual tools which make such investigations possible A strong emphasis is given to information measures that are essential for the study of devices of finite size including Rnyi entropies and smooth entropies The presentation is self contained and includes rigorous and concise proofs of the most important properties of these measures The first chapters will introduce the formalism of quantum mechanics with particular emphasis on norms and metrics for quantum states This is necessary to explore quantum generalizations of Rnyi divergence and conditional entropy information measures that lie at the core of information theory The smooth entropy framework is discussed next and provides a natural means to lift many arguments from information theory to the quantum setting Finally selected applications of the theory to statistics and cryptography are discussed The book is aimed at graduate students in Physics and Information Theory Mathematical fluency is necessary but no prior knowledge of quantum theory is required

Performative Democracy Elzbieta

Matynia, 2015-12-03 fresh appreciation of the events of 1989 as we approach their 20th anniversary in 2009 *Performative Democracy* explores a potential in political life that easily escapes theorists the indigenously inspired enacting of democracy by citizens Written by one who experienced an emerging public sphere within Communist Poland the book seeks to identify the conditions for performativity performing politics in public life It examines a broad spectrum of cultural social and political initiatives that facilitated the non violent transformation of an autocratic environment into a democratic one Examples of performativity range from experimental student theater through the engaged political thinking of dissident Adam Michnik the alternative culture and the Solidarity movement to the drama of the Round Table Talks and their striking parallels in South Africa and finally the post 1989 efforts of feminist groups and women artists to defend the recently won right of free public discourse The book argues that performative democracy with its improvisational mode and imaginative solutions deserves a legitimate place in our broader reflections on democracy Matynia describes how two apparent miracles of recent history that communism in Poland was brought down without violence and that apartheid in South Africa was ended without a bloodbath were the results of hard work and a new approach to change that she calls performative democracy Matynia reveals amazing parallels between the drama of Poland's Round Table Talks in 1989 and the Truth Commissions in South Africa in 1994 Matynia describes how experimental student theater groups though subsidized by a totalitarian regime afraid of any authentic public life created little pockets of public space for free and meaningful expression that were augmented by uncensored underground publishing and further expanded by the Solidarity movement into a democratic society within the totalitarian state Matynia describes in a personal way how in the 1970s student theater groups planted the seeds of an authentic public sphere how underground publishers nurtured freedom of expression and social criticism and how after democratic elections women artists in the 1990s fought to sustain the newly won right to free public discourse Matynia traces in vivid human terms the democratic aspirations and practices that led to democratic change in Poland but went largely unnoticed by western media and policymakers *Thermal Effects in Supercapacitors* Guoping Xiong, Arpan

Kundu, Timothy S. Fisher, 2015-06-17 This Brief reviews contemporary research conducted in university and industry laboratories on thermal management in electrochemical energy storage systems capacitors and batteries that have been widely used as power sources in many practical applications such as automobiles hybrid transport renewable energy installations power backup and electronic devices Placing a particular emphasis on supercapacitors the authors discuss how supercapacitors or ultra capacitors are complementing and replacing batteries because of their faster power delivery longer life cycle and higher coulombic efficiency while providing higher energy density than conventional electrolytic capacitors Recent advances in both macro and micro capacitor technologies are covered The work facilitates systematic understanding of thermal transport in such devices that can help develop better power management systems **The Economics of**

Health Reconsidered, Fourth Edition Thomas Rice, PhD, Lynn Unruh, PhD, RN, 2015-06-01 Instructor Resources

PowerPoint slides important chapter concepts discussion questions with answers additional readings and a transition guide to the new edition Now in its fourth edition *The Economics of Health Reconsidered* presents an argument that still holds true despite assertions to the contrary neither economic theory nor evidence shows that reliance on market forces leads to superior outcomes in healthcare systems Government plays a crucial role in making the healthcare sector not only more equitable but also more efficient This book reconsiders the field of health economics as it is traditionally taught and practiced It critically examines economic theory as applied to the health sector and questions the prevailing belief that a competitive healthcare marketplace results in the best outcomes Fully revised and updated this new edition incorporates information on the impact of the implementation of the Affordable Care Act as well as A new chapter on healthcare expenditures which examines healthcare spending in the United States and in other high income countries including the magnitude growth and causes of high expenditures and the different policies that have been used or proposed to help control them A new chapter that describes the various types of economic evaluation currently used in healthcare discusses the issues that arise with the use of economic evaluations and provides information on how to conduct an economic evaluation New and updated data throughout chapters and exhibits This book serves as an ideal standalone text for health economics and health policy courses and as a general reference for issues in health economics

Handbook of Nanoceramic and Nanocomposite Coatings and Materials Abdel Salam Hamdy Makhlouf, Dieter Scharnweber, 2015-05-08 In this new handbook top researchers from around the world discuss recent academic and industrial advances in designing ceramic coatings and materials They describe the role of nanotechnology in designing high performance nanoceramic coatings and materials in terms of the unique advantages that can be gained from the nanoscale including the latest techniques for the synthesis and processing of ceramic and composite coatings for different applications Focuses on the most advanced technologies for industry oriented nanoceramic and nanocomposite coatings including recent challenges for scaling up nanobased coatings in industry Covers the latest evaluation methods for measuring coatings performance Discusses novel approaches for improving the performance of ceramic and composite coatings and materials via nanotechnology Provides the most recent and advanced techniques for surface characterization

Visual Inspection Technology in the Hard Disk Drive Industry Paisarn Muneesawang, Suchart Yammen, 2015-04-13 A presentation of the use of computer vision systems to control manufacturing processes and product quality in the hard disk drive industry *Visual Inspection Technology in the Hard Disk Drive Industry* is an application oriented book borne out of collaborative research with the world's leading hard disk drive companies It covers the latest developments and important topics in computer vision technology in hard disk drive manufacturing as well as offering a glimpse of future technologies

Hydraulic Machinery and Cavitation Enrique Cabrera, Vicent Espert, Fernando Martínez, 2015-02-27 Hydraulic machinery such as turbines and pumps is widely used around the world Related topics concerning design operation and maintenance are of relevant interest In this context

cavitation is a phenomenon to be taken into account and this was treated in the XVIII IAHR Symposium on Hydraulic Machinery and Cavitation which took place in Valencia Spain 16th 19th September 1996 and which was hosted by the Polytechnic University of Valencia The proceedings of the Symposium have been published in two volumes In this first volume the papers included cover the following topics Hydraulic Turbines Analysis and Design Hydraulic Pumps Hydraulic Elements Dynamic Characterization and Hydraulic Behaviour Cavitation and Sand Erosion In the second volume the papers included cover the following topics Hydraulic Transients and Control Systems Related to Hydraulic Machinery and Plants Oscillatory and Vibration Problems in Hydraulic Machinery and Power Stations Experimental Investigations related to Hydraulic Machinery and its Applications Practical Applications of the Hydraulic Machinery Monitoring Predictive Maintenance and Refurbishment The 119 papers presented at the Symposium from research groups consulting companies and manufacturers constitute an important collection for investigators engineers and technicians who are interested in updated information on hydraulic machinery This book is intended to be a reference text comprising the latest innovations on this subject **Advances in Managing Humanitarian Operations** Christopher W. Zobel,Nezih Altay,Mark P.

Haselkorn,2015-12-17 This volume provides a survey of current research problems and results in humanitarian operations research Additionally it discusses existing applications of humanitarian operations research and considers new research efforts that clearly extend existing research and applications The book is divided into three sections that provide an overview of the subject a look at the theory and an examination of applications The overview section presents chapters on modeling approaches and metrics to evaluate nonprofit operations chief findings of fieldwork research in disaster response logistics the use of cash as a form of relief and measuring markets that supply cash based humanitarian interventions The theory section includes chapters that examine the partner proliferation problem in disaster response networks a case study of humanitarian logistics that examines how humanitarian culture informs change adoption and a look at the current state of the art for information visibility in humanitarian operations Finally the application section focuses on blood products vaccines and food assistance with individual chapters on efficient inventorying and distribution of blood products during disasters a detailed look at modeling in the context of the vaccine supply chain a framework for achieving equity effectiveness and efficiency in food bank operations and a spatio temporal vulnerability assessment of the resilience of a population affected by sudden lack of food **Mechanics of Structures and Materials XXIV** Hong Hao,Chunwei Zhang,2019-08-08 Mechanics of Structures and Materials Advancements and Challenges is a collection of peer reviewed papers presented at the 24th

Australasian Conference on the Mechanics of Structures and Materials ACMSM24 Curtin University Perth Western Australia 6 9 December 2016 The contributions from academics researchers and practising engineers from Australasian Asia Pacific region and around the world cover a wide range of topics including Structural mechanics Computational mechanics Reinforced and prestressed concrete structures Steel structures Composite structures Civil engineering materials Fire

engineering Coastal and offshore structures Dynamic analysis of structures Structural health monitoring and damage identification Structural reliability analysis and design Structural optimization Fracture and damage mechanics Soil mechanics and foundation engineering Pavement materials and technology Shock and impact loading Earthquake loading Traffic and other man made loadings Wave and wind loading Thermal effects Design codes Mechanics of Structures and Materials Advancements and Challenges will be of interest to academics and professionals involved in Structural Engineering and Materials Science

Nanozymology Xiyun Yan, 2020-01-30 This book introduces the new concept of nanozyme which refers to nanomaterials with intrinsic enzymatic activity rather than nanomaterials with biological enzymes incorporated on the surface The book presents the cutting edge advances in nanozyme with emphasis on state of the art applications in many important fields such as in the biomedical fields and for environmental protection The nanozyme is a totally new type of artificial enzyme and exhibits huge advantages over natural enzymes including greater stability low cost versatility simplicity and suitability for industry It is of interest to university researchers R D engineers as well as graduate students in nanoscience and technology and biology wishing to learn the core principles methods and the corresponding applications of nanozyme

When Political Transitions Work Fanie du Toit, 2018-07-27 The peaceful end of apartheid in South Africa was a monumental event in late twentieth century history A racist regime built upon a foundation of colonialist exploitation South Africa had become by that point a tinderbox suffused with day to day violence and political extremism on all sides Yet two decades later it was a stable democracy with a growing economy How did such a deeply divided conflicted society manage this remarkable transition In *When Political Transitions Work* Fanie du Toit who has been a participant and close observer in post conflict developments throughout Africa for decades offers a new theory for why South Africa's reconciliation worked and why its lessons remain relevant for other nations emerging from civil conflicts He uses reconciliation as a framework for political transition and seeks to answer three key questions how do the reconciliation processes begin how can political transitions result in inclusive and fair institutional change and to what extent does reconciliation change the way a society functions Looking at South Africa one of reconciliation's most celebrated cases du Toit shows that the key ingredient to successful reconciliations is acknowledging the centrality of relationships He further develops his own theoretical approach to reconciliation as interdependence the idea that reconciliation is the result of an integrated process of courageous leadership fair and inclusive institutions and social change built toward a mutual goal of prosperity As du Toit conveys the motivation for reconciliation is the long term well being of one's own community as well as that of enemy groups Without ensuring the conditions in which one's enemy can flourish one's own community is unlikely to prosper sustainably

State Formation After Civil War Derek M Powell, 2016-08-05 State formation after civil war offers a new model for studying the formation of the state in a national peace transition as an integrated national phenomenon Current models of peacebuilding and state building limit that possibility reproducing a fragmented selective view of this complex reality Placing too much

emphasis on state building as design they place too little on understanding state formation as unplanned historical process The dominant focus on national institutions also ignores the role that cities and civic polities have played in constituting the modern state Mining ideas from many disciplines and evidence from 19 peace processes including South Africa the book argues that the starting point for building a systematic theory is to explain a distinct pattern to state formation that can be observed in practice Despite their conflicts people in fragile societies bargain terms for peaceful coexistence they make attempts to constitute the right to rule as valid state authority in circumstances prone to conflict over which they have imperfect influence not control Though the kind of institutions created will differ with context how rules for state authority are institutionalized follows a consistent basic pattern That pattern defines state formation in peace transitions as both a unified if contingent field of normative practice and an object of comparative study Where the national centric models see local government as a matter belonging to policy on decentralization for later in the reconstruction phase the book uncovers a distinct local government dimension to peace transitions A civic dimension to national conflicts that must be explained incipient or proto local authorities that emerge even during civil war in peace making after state collapse the fact that it is common for peace agreements and constitutions to include rules for local authority for local elections to be held as part of broader democratization and for laws to be enacted to establish local government as part of peace compacts The book develops the concept of local peace transition to explain the distinctive constitutive role of this local dimension in peace making and state formation This path breaking book will be of compelling interest to practitioners scholars and students of comparative constitutional studies international law peace building and state building

The Well-being of International Migrants in Rural Areas: Bridging the Migration-Development Nexus Philomena De Lima, Belinda Leach, David Radford, Seema Arora-Jonsson, 2022-10-17

From Particle Systems to Partial Differential Equations Patrícia Gonçalves, Ana Jacinta Soares, 2017-11-15 This book addresses mathematical problems motivated by various applications in physics engineering chemistry and biology It gathers the lecture notes from the mini course presented by Jean Christophe Mourrat on the construction of the various stochastic basic terms involved in the formulation of the dynamic 4 theory in three space dimensions as well as selected contributions presented at the fourth meeting on Particle Systems and PDEs which was held at the University of Minho's Centre of Mathematics in December 2015 The purpose of the conference was to bring together prominent researchers working in the fields of particle systems and partial differential equations offering them a forum to present their recent results and discuss their topics of expertise The meeting was also intended to present to a vast and varied public including young researchers the area of interacting particle systems its underlying motivation and its relation to partial differential equations The book will be of great interest to probabilists analysts and all mathematicians whose work focuses on topics in mathematical physics stochastic processes and differential

equations in general as well as physicists working in statistical mechanics and kinetic theory
