the language BPMN or Business Process Model and Notation is the standard for modeling business processes Currently under the care of The Object Management Group OMG BPMN has had a checkered history which we believe reflects the complexity it seeks to standardise Process models are much older than the kind of models that UML tried to standardize These UML models often have a much more intimate relationship with software development We can trace process models back to Frederick Winslow Taylor who was one of the first to attempt to look at production processes in a scientific way This happened in the 19th century at a time when people had unwavering faith in the ability of science and technology to solve all problems Before you can proceed to control improve or even innovate the processes of your organization it is important to provide insight into the processes How do you ensure that the knowledge of individuals comes together and is transferable and accessible to the entire organization As a modeling language BPMN offers a standard for communicating about business processes BPMNTM is a registered trademark of Object Management Group OMG Limited used under permission of OMG Limited All rights reserved Academy-Industry Relationships and Partnerships Tracy Bridgeford, Kirk St.
