has grown leaps and bounds within the last decade Aviation courses and training at all levels have shown an exponential  
increase around the globe There has been a restricted focus on writing books in this sector of the economy mainly due to the  
shortage of expertise in this specialist and complex area This book was written with the purpose of meeting this need of the  
aviation sector Due to the diversified nature of aviation knowledge which includes flying engineering airports allied trades  
for aircraft and airports airline and airport management and operations education etc one text alone will not suffice and do  
justice to address all these areas It is envisaged to develop subsequent parts of this book to cover all these knowledge areas  
This book is the first installment of any subsequent books and explores issues including airline management and operations  
airline business models airport systems flight operational procedures aircraft maintenance runway safety management  
systems and air traffic management In particular attention will be given to aspects such as analysis of air traffic in a domestic  
market runway safety management systems critical success factors for multiple MRO service providers key pain points of the  
industry to be addressed to move into the future new research on hub airports for international flights new business models  
for airlines and runway safety management systems This book is useful to aviation managers educators students and  
professionals interested in any of the above issues      **Forensic Engineering** Kenneth L. Carper, 2000-09-28 This edition of
