Clear the confusion, streamline processes, and ensure accuracy with *Essential Forms for Therapists*. For a rehab facility, proper documentation is the most critical aspect of financial survival. This book and CD-ROM set features over 100 modifiable forms including: Therapy registration forms, Plan of treatment for outpatient rehabilitation forms, Plan of progress forms, Therapy daily notes forms, and flow sheets. All are designed and tested by experts in the field to ensure that critical information is recorded accurately. Save time and streamline your processes. The book is divided into four sections for your convenience: Therapy documentation, Managed care, Personnel management and human resources, and Essential CMS. The content in this book builds on the curriculum taught at the Norwegian Gestalt Institute University College NGI. The material is divided into four main sections. In the first section the theoretical basis for gestalt therapy is presented with references to gestalt psychology, field theory, phenomenology and existential philosophy. In the later parts, central theoretical terms and practical models are discussed such as the paradoxical theory of change, creative adjustment, self contact, contact forms, awareness, polarities and process models. Clinical examples illustrate the therapy form's emphasis on the relational meeting between therapist and client.
