2 eTrex Summit Buttons

3 Installing the Batteries

The eTrex Summit operates on two AA batteries (not included), which are installed at the back of the unit. To install the batteries, remove the battery cover by turning the D-Ring at the back of the unit 90° away from the device. Insert the batteries into positions observing proper polarity. Attach the battery cover by turning the D-Ring 90° back clockwise.

4 Selecting a Page

All of the information needed to operate the eTrex Summit is found on six main "pages" for display screens. These pages are the SkyView, Map, Power, Top Computers, Elevation, and Menu. Once power is applied, press the **PAGE** button to switch between pages.

5 Finding Your Current Position

Before you can actually use your eTrex Summit for navigation, you must first obtain a fix on your current position. To do this, take your eTrex Summit outside and find a large, open area that has a clear view of the sky. Press and hold the **POWER** button to turn the unit on. You'll see the Welcome Page for a few seconds while the eTrex Summit performs a self-test, followed by the Skyline Page. The eTrex Summit needs to receive at least three strong satellite signals to find your location.

When you see the "READY TO NAVIGATE" message on the Skyline Page, eTrex Summit has found your location.

NOTE: The first time you use your eTrex Summit, it could take up to five minutes to find your location. After the first time use, eTrex Summit only needs about 15 to 45 seconds to find your location. If the eTrex Summit does not display your local time (bottom of the Menu Page), follow the instructions in the Getting Started section of your Owner's Manual to set the correct time.

6 Backlighting and Contrast

To turn the backlighting on, press and release the **POWER** button from any screen. The backlight is turned on only on for 30 seconds to save battery power. To adjust the screen contrast, press the **PAGE** button until you see the SkyView Page. Press the **UP** button to make the screen darker, press the **DOWN** button to make the screen lighter.
