

Model 2 – Random Sampling Method

- a. According to Model 2, what is the probability of selecting a red die in a random draw out of the bag below?

The probability of selecting a red die in a random draw out of this bag is 1/6. There are 6 sides, 1 is red.

- b. Suppose you draw a die from the bag above and it is a number greater than 4. What is the probability of selecting a red die in a subsequent draw without replacement?

The probability of selecting a red die is determined by using replacement, not according to what is left in the bag. If you draw a die and then you draw a die again, the probability of selecting a red die will get either higher or lower depending on what you get the first time.
