*Focus On: 100 Most Popular Compact Cars* Wikipedia contributors, *Business World*, 2003      **Some mechanical Problems in relation to high speed Diesel engines**, 1935      *Technical Problems Associated with Diesel Fuels in Interstate Coach Operation* W. A. Duvall, 1954 The quality and availability of diesel fuel has so nearly kept pace with the development of the diesel engine in interstate coach service that one would almost be inclined to say that there were no problems When one thinks back to the early years of the diesel engine in this type of service it is impossible not to feel that the progress in the development of the two cycle engine and the evolution of specifications leading to present day fuels indicate that the development of the two must be closely related Stuck valves broken and burned pistons and stuck and broken rings were some of the early problems most closely related to fuel Of course it is impossible to separate lubrication problems from the fuel in this type of failure In fact it is impossible to say that they were not sometimes related to the mechanical failures that so often occurred during the same period and which because of their nature could not be separated or definitely identified as being caused purely by one thing or another In any case the interstate coach services did elect to stay with the diesel engine through these early years in spite of the problems attendant upon a nonmilitary operation in the midst of a major war During those years the oil suppliers always managed to supply the needs of these companies not only for diesel fuel but for gasoline as well they supplied the best quality fuel that was at their command while keeping in mind of course that winning the war was the primary objective      *Report of the Diesel Fuel Task Force* California. Diesel Fuel Task Force, 1994      Technical Problems Associated with Diesel Fuels in Contractors' Equipment J. W. Vollentine, 1954 The contractors in this country generally have no operating conditions with diesel fuels which can be considered to constitute a field problem Occasionally however annoying incidents occur which are the result of fuel characteristics or unsatisfactory fuel handling The contractor is interested primarily in the following items which are in whole or in part affected by diesel fuels 1 Engine starting 2 Fuel handling 3 Fuel injection equipment wear 4 Piston ring and cylinder liner wear 5 Engine maintenance and 6 Fuel cost The fuel characteristics which influence these items of operation will be considered here as well as some characteristics that are considered to be relatively unimportant      Technical Problems Associated with Diesel Fuels in Contractors Equipment - to be Presented February 17, 1954, ASTM Symposium on Diesel Fuels, Philadelphia, PA J.
