Multitrophic Interactions in Terrestrial Systems A. C. Gange,V. K. Brown,2002-08 Multitrophic interactions are now recognised as being of the utmost importance in understanding the complexity of the natural world However their complex nature had often been a barrier to their study as they require research teams composed of workers often with very disparate interests This book therefore takes a multidisciplinary approach to complex interactions across many trophic levels and includes authors from disciplines as diverse as mycology entomology nematology population ecology and theoretical ecology Throughout the direct and indirect interactions between organisms from different trophic levels are emphasised in comprehensive reviews bringing a fresh collaborative approach to community ecology The book is ideal for those seeking an overview of our understanding of multitrophic interactions as well as directions for future research **Holt Biology** Holt Rinehart & Winston,2003-08 **Aquatic Food Webs** Andrea Belgrano,2005 Aquatic Food Webs provides a current synthesis of theoretical and empirical food web research The textbook is suitable for graduate level students as well as professional researchers in community ecosystem and theoretical ecology in aquatic ecology and in conservation biology **Holt Biology** Rob DeSalle,Holt Rinehart and Winston,2008 Holt Biology Student Edition 2008 **Encyclopedia of Theoretical Ecology** Alan Hastings,Louis J.
