How to Write Better Medical Papers Michael Hanna, 2019-03-20 This book guides medical researchers through all stages of transforming their scientific data and ideas into a published paper Many researchers in medicine including the life sciences and health sciences struggle to get their research written and published Manuscripts are typically rejected and or sent back for revisions several times before ever being published One reason for this is that researchers have not received much instruction in the specific subjects and skills needed to write and publish scientific medical papers research methodology ethics statistics data visualization writing revising and the practicalities of publishing Instead of wasting the reader's time discussing trivialities of punctuation spelling etc this book tackles all the major scientific issues that routinely lead to manuscripts getting rejected from the journals The section Preparing covers the range of methodological ethical and practical aspects that researchers need to address before starting to write their paper The section Analyzing reviews commonplace problems in the statistical analysis and presentation and how to resolve those problems The section Drafting describes what to write in all the various parts of a paper the Introduction Methods Results Discussion Abstract etc The section Revising explains and illustrates how to improve the writing style of any manuscript The section Publishing discusses how to navigate the peer review process and all other practical aspects of the publishing phase This book draws on the author's decade of experience as an independent medical writer and research consultant but it is not written merely as the personal opinion of yet another expert The entire book is grounded in the existing scientific and scholarly literature with extensive references and a lengthy annotated bibliography so readers can quickly obtain more information on any aspect they want Thus this book provides a more evidence based scholarly account of how medical scientific papers should be written in order to improve medical communication and accelerate scientific progress After reading this entire book cover to cover medical researchers will know how to write better quality medical papers and they will be able to publish their work in better journals with less time and struggle This book is essential reading for anyone conducting research in clinical medicine life sciences or health sciences

A Cp-Theory Problem Book Vladimir V. Tkachuk, 2016-04-05 This fourth volume in Vladimir Tkachuk's series on Cp theory gives reasonably complete coverage of the theory of functional equivalencies through 500 carefully selected problems and exercises By systematically introducing each of the major topics of Cp theory the book is intended to bring a dedicated reader from basic topological principles to the frontiers of modern research The book presents complete and up to date information on the preservation of topological properties by homeomorphisms of function spaces An exhaustive theory of t equivalent u equivalent and l equivalent spaces is developed from scratch The reader will also find introductions to the theory of uniform spaces the theory of locally convex spaces as well as the theory of inverse systems and dimension theory Moreover the inclusion of Kolmogorov's solution of Hilbert's Problem 13 is included as it is needed for the presentation of the theory of l equivalent spaces This volume contains the most important classical results on functional

equivalencies in particular Gul'ko and Khmyleva's example of non-preservation of compactness by the equivalence Okunev's method of constructing equivalent spaces and the theorem of Marciszewski and Pelant on the invariance of absolute Borel sets
