The Linguistic Cycle Elly van Gelderen, 2011-04-08 Elly van Gelderen provides examples of linguistic cycles from a number of languages and language families along with an account of the linguistic cycle in terms of minimalist economy principles. A cycle involves grammaticalization from lexical to functional category followed by renewal. Some well known cycles involve negatives where full negative phrases are reanalyzed as words and affixes and are then renewed by full phrases again. Verbal agreement is another example full pronouns are reanalyzed as agreement markers and are renewed again. Each chapter provides data on a separate cycle from a myriad of languages. Van Gelderen argues that the cross linguistic similarities can be seen as Economy Principles present in the initial cognitive system or Universal Grammar. She further claims that some of the cycles can be used to classify a language as analytic or synthetic and she provides insight into the shape of the earliest human language and how it evolved.

The Handbook of Lexical Functional Grammar Mary Dalrymple, 2023-12-14 Lexical Functional Grammar LFG is a nontransformational theory of linguistic structure first developed in the 1970s by Joan Bresnan and Ronald M Kaplan which assumes that language is best described and modeled by parallel structures representing different facets of linguistic organization and information related by means of functional correspondences. This volume has five parts. Part I Overview and Introduction provides an introduction to core syntactic concepts and representations. Part II Grammatical Phenomena reviews LFG work on a range of grammatical phenomena or constructions. Part III Grammatical modules and interfaces provides an overview of LFG work on semantics argument structure prosody information structure and morphology. Part IV Linguistic disciplines reviews LFG work in the disciplines of historical linguistics learnability psycholinguistics and second language learning. Part V Formal and computational issues and applications provides an overview of computational and formal properties of the theory implementations and computational work on parsing translation grammar induction and treebanks. Part VI Language families and regions reviews LFG work on languages spoken in particular geographical areas or in particular language families. The

final section Comparing LFG with other linguistic theories discusses LFG work in relation to other theoretical approaches
