Guide to Switching to the Mac Gary Rosenzweig, 2009-09-25 Switching to the Mac. Awesome. You've got company. Lots of it. And with this book you've got help, too. All the help you'll ever need. MacMost.com founder Gary Rosenzweig quickly gets you comfy with your new Mac. Demonstrates the Mac way to perform every common Windows task and shows how to do more with Macs than you ever could in Windows way more. It's all here, everything from choosing the right Mac to creating your own videos and DVDs. Rosenzweig covers the latest Macs and the new Mac OS X 10.6 Snow Leopard operating system. Best of all, he focuses on what today's computer users need to know, including loads of coverage of using your Mac on the Web. Every Mac switcher needs a friendly Mac expert to show them the ropes. With this book you've got yours. Discover what's different about your Mac's hardware and software and what's similar, too. Navigate the Finder and learn how Mac files are organized. Make the most of the Mac's built-in applications. Move your stuff from your PC to your new Mac. Use Safari, Mac's great built-in Web browser. Set up Mac email, instant messaging and audio and video chatting. Share, back up and archive your files. Choose and use Mac business and productivity applications. Organize your music and buy new songs with iTunes. Import, manage, edit and share your photos. Create awesome videos with iMovie, QuickTime and iDVD. Run Windows on your Mac if you must. Keep your Mac up to date and running smoothly. **Mac OS X Leopard** Mike Lee, Scott Meyers, 2008-05-14 Good computer books make assumptions about the reader: what they do and don't know when they pick up the book and what they want to know when they put it down. For each reader, this could be very different. Therefore, a book that suits one person may not be the best for another. Mac OS X Leopard Beyond the Manual makes some assumptions, too: ones that tend to differ from other Mac OS X books. First of all, we assume that you have used a computer in the past, that you know how to use a mouse and you know the proper place to stick a DVD to get it to play in your computer. We won't be showing you these things. We will, however, demonstrate to our Mac converts how to right-click on a trackpad with only one button. Second, we assume you know what you want to do with your computer. We won't waste your time showing you specifically, step by step, how to order a pizza from Pizza Galaxy in Milwaukee, Wisconsin, with Safari, though when you're done with this book we think you'll be able to do this just fine if such a place exists anyway. Finally, we assume that you are a reasonably intelligent person who realizes the value of such phrases as "Give a man a fish, you have fed him for today; Teach a man to fish, and you have fed him for a

lifetime and can imagine how that might apply to a computer book. If this sounds like you then we think you'll find this book rewarding. Inside you will find everything you need to get up to speed with Mac OS X Leopard including Using the standard included Leopard applications including Mail Safari Preview and more Taking advantage of the Darwin subsystem in Leopard Learning all the ins and outs of the Finder and Leopard's improved interface Administering your computer for yourself and for others Working with other computers and operating systems from you Mac Configuring the network to take full advantage of the powerful networking capabilities in Leopard Working with add on devices via USB Firewire and Bluetooth Effectively implementing data backup recovery and security Getting started with OS X development in Leopard **My New Mac**
