**System Theory -- A Modern Approach, Volume 1** Henri Bourles, 2024-07-11 The theory of dynamic systems is addressed in this book in accordance with the modern approach heir to algebraic analysis which has been implemented since the last decade of the 20th century After a reminder of the evolution of the representation of systems based on transfer functions or matrices the duality of controllability and observability is revisited and new results are produced concerning time varying discrete time systems To complete and improve the existing analyses the poles and zeros of linear systems and their interconnections are presented in a new way as well as the problem of systems governed by functional differential equations of retarded or neutral type and their stabilization This book also proposes known and original mathematical complements

**Linear Algebra and Its Applications** David C. Lay, 2011-11-21 Linear algebra is relatively easy for students during the early stages of the course when the material is presented in a familiar concrete setting But when abstract concepts are introduced students often hit a brick wall Instructors seem to agree that certain concepts such as linear independence spanning subspace vector space and linear transformations are not easily understood and require time to assimilate Since they are fundamental to the study of linear algebra students understanding of these concepts is vital to their mastery of the subject David Lay introduces these concepts early in a familiar concrete  $\mathbb{R}^n$  setting develops them gradually and returns to them again and again throughout the text so that when discussed in the abstract these concepts are more accessible Note This is the standalone book if you want the book access card order the ISBN below 0321399145 9780321399144 Linear Algebra plus MyMathLab Getting Started Kit for Linear Algebra and Its Applications Package consists of 0321385179 9780321385178 Linear Algebra and Its Applications 0321431308 9780321431301 MyMathLab MyStatLab Glue in Access Card 0321654064 9780321654069 MyMathLab Inside Star Sticker
