Renewables Michael Aklin, Johannes Urpelainen, 2018-03-23 A comprehensive political analysis of the rapid growth in renewable wind and solar power mapping an energy transition through theory case studies and policy Wind and solar are the most dynamic components of the global power sector How did this happen After the 1973 oil crisis the limitations of an energy system based on fossil fuels created an urgent need to experiment with alternatives and some pioneering governments reaped political gains by investing heavily in alternative energy such as wind or solar power Public policy enabled growth over time and economies of scale brought down costs dramatically In this book Michael Aklin and Johannes Urpelainen offer a comprehensive political analysis of the rapid growth in renewable wind and solar power mapping an energy transition through theory case studies and policy analysis Aklin and Urpelainen argue that because the fossil fuel energy system and political support for it are so entrenched only an external shock an abrupt rise in oil prices or a nuclear power accident for example allows renewable energy to grow They analyze the key factors that enable renewable energy to withstand political backlash and they draw on this analysis to explain and predict the development of renewable energy in different countries over time They examine the pioneering efforts in the United States Germany and Denmark after the 1973 oil crisis and other shocks explain why the United States surrendered its leadership role in renewable energy and trace the recent rapid growth of modern renewables in electricity generation describing among other things the return of wind and solar to the United States Finally they apply the lessons of their analysis to contemporary energy policy issues

Grading for Equity Joe Feldman, 2023-08-26 For some time traditional A F grading practices have been under fire from a wide range of stakeholder Grading policies are wildly inconsistent from classroom to classroom frequently misguided uninformed and frequently based on subjective judgments Of even more concern our grading practices exacerbate the achievement gap It is well documented that African American and Latino students boys as well as special education students are disproportionately suspended and expelled influenced by teachers unconscious but biased judgments of student behavior Virtually ignored is how teachers incorporate subjective and non academic criteria into their grades through criteria such as student attitude participation and effort and how approach to grading contributes to these same students disproportionately high course failure rates and disproportionately low placement in advanced academic tracks

U.S. Foreign Policy Steven W. Hook, 2015-12-18 The same aspects of American government and society that propelled the United States to global primacy have also hampered its orderly and successful conduct of foreign policy This paradox challenges U S leaders to overcome threats to America's world power in the face of fast moving global developments and political upheavals at home

The fully updated Fifth Edition of Steven W Hook's *U S Foreign Policy The Paradox of World Power* explores this paradox identifies its key sources and manifestations and considers its future implications as it asks whether U S foreign policymakers can manage these dynamics in a manner that preserves U S primacy

real world problems as well as a vision of the future research this book is a valuable resource for all those interested in this area *Recent Metaheuristic Computation Schemes in Engineering* Erik Cuevas,Alma Rodríguez,Avelina

Alejo-Reyes,Carolina Del-Valle-Soto,2021-02-04 This book includes two objectives The first goal is to present advances and developments which have proved to be effective in their application to several complex problems The second objective is to present the performance comparison of various metaheuristic techniques when they face complex optimization problems The material has been compiled from a teaching perspective Most of the problems in science engineering economics and other areas can be translated as an optimization or a search problem According to their characteristics some problems can be simple that can be solved by traditional optimization methods based on mathematical analysis However most of the problems of practical importance in engineering represent complex scenarios so that they are very hard to be solved by using traditional approaches Under such circumstances metaheuristic has emerged as the best alternative to solve this kind of complex formulations This book is primarily intended for undergraduate and postgraduate students Engineers and application developers can also benefit from the book contents since it has been structured so that each chapter can be read independently from the others and therefore only potential interesting information can be quickly available for solving an industrial problem at hand *Reading* Vincent Quinn,2020-06-01 Why do we read and have we always read in the same way

Reading A cultural practice uses a rich variety of literary and visual sources to explore how reading has changed and continues to change in response to new technologies and shifting social pressures Drawing on medieval illustrations classic fiction the art and literature of the Bloomsbury Group and contemporary e culture the book shows that there is no single unchanging thing called reading instead it is something that mutates over time Throughout history ways of reading and theories of reading have been shaped by religious and educational institutions This continues to be true but current approaches to reading are also conditioned by debates over digital culture and social media use Reading A cultural practice re frames these contemporary preoccupations by offering a long view on how our notions of books and reading alter according to social and historical context
