Metaphor About Someone Not Well Behaved:

Metaphor in Educational Discourse Lynne Cameron, 2003-03-13 *Metaphor in Educational Discourse* is a superb piece of applied linguistics research that integrates Vygotsky's theory of concepts with current work on metaphor into a coherent framework for investigating how teachers and learners negotiate figurative language in order to promote development in the classroom setting. In what is likely to become the standard for future studies in this area, Lynne Cameron meticulously demonstrates the central role of linguistic metaphors in classroom learning designed to lead learners to a deeper understanding of complex mathematical and scientific concepts. James P. Lantolf, Professor of Applied Linguistics, The Pennsylvania State University. This book reports research into metaphor in use with school students. The setting for the research is a UK school and the participants are around ten years old with their first language well established but still developing concepts and understandings. Close examination of a corpus of classroom spoken discourse reveals how metaphor is employed by their teachers not just in explaining ideas but in managing and mediating the activity of the classroom and the learning of the students. Particular issues discussed include the problems of identifying metaphors in spoken discourse, the conventionalism of metaphors in the discourse of socio-cultural groups, and how a socio-cultural approach can account for systematicity in metaphor use.

A Spectrum of Solutions for Clients with Autism Rachel Bedard, Lorna Hecker, 2020-07-29 This book is a comprehensive resource to guide work with individuals on the autism spectrum. It reflects the true range of needs presented by individuals with autism, pulling together the most salient aspects of treatment with invaluable information from several disciplines synthesized to guide your work. Divided into topical sections with chapters from three field experts in each, this book features contributions from therapists, educators, and medical doctors, as well as financial planners, health advocates, and innovators. The diverse disciplines and backgrounds of each author lend a different voice and perspective to each chapter, reflecting the continuum of care necessary when working with clientele on the autism spectrum and that for clients on the spectrum, one solution does not fit all. For use by psychotherapists, counselors, applied behavioral analysts, occupational therapists, social workers, teachers, and more, this text presents readers with expertise from various contributing disciplines to give them a treatment resource that can inform and guide their daily work with clients on the autism spectrum.

Metaphors of Confinement Monika Fludernik, 2019-08-13 *Metaphors of Confinement: The Prison in Fact, Fiction, and Fantasy* offers a historical survey of imaginings of the prison as expressed in carceral metaphors in a range of texts about imprisonment from Antiquity to the present, as well as non-penal situations described as confining or restrictive. These imaginings coalesce into a carceral imaginary that determines the way we think about prisons, just as social debates about punishment and criminals feed into the way carceral imaginary develops over time. Examining not only English language

prose fiction but also poetry and drama from the Middle Ages to postcolonial particularly African literature the book juxtaposes literary and non literary contexts and contrasts fictional and nonfictional representations of imprisonment and discussions about the prison as institution and experiential reality It comments on present day trends of punitivity and foregrounds the ethical dimensions of penal punishment The main argument concerns the continuity of carceral metaphors through the centuries despite historical developments that included major shifts in policy such as the invention of the penitentiary The study looks at selected carceral metaphors often from two complementary perspectives such as the home as prison or the prison as home or the factory as prison and the prison as factory The case studies present particularly relevant genres and texts that employ these metaphors often from a historical perspective that analyses development through different periods

Political Metaphor Analysis Andreas Musolff, 2016-08-25 Political metaphors and related figurative discourse tools are characterised by their variability and contentiousness Using them discourse participants try to gain competitive advantage over others by offering their audiences new meaning nuances challenging each other and announcing political initiatives It is here that metaphor as a means to change meanings and thus to change social and political reality comes into its own *Political Metaphor Analysis* provides an innovative approach to the study of figurative language use in political discourse by presenting empirical analyses based on a large corpus of political metaphors and metonymies linking these analyses to theoretical positions and assessing their limitations and perspectives for further exploration The classic model of conceptual metaphor analysis pioneered by Lakoff and Johnson 1980 and expanded and amended over the past thirty five years is critically examined with regard to new findings about the variation historicity pragmatic exploitation comprehension and interpretation of metaphors As a central new analytical category the notion of

metaphor scenario is proposed and tested against various sub sets of data It allows to link hypothesised conceptual metaphors to narrative argumentative and evaluative patterns in actual discourse and understanding processes so that their cognitive significance can be more reliably gauged and theoretically modelled

Latterell, Janelle L. Wilson, 2020-04-10 United States students continue to have difficulties with the subject of mathematics. Sometimes it is believed that students aren't smart enough to master mathematics or that mathematics is just too difficult for all but the chosen few. This book offers an alternative explanation. Students' difficulties in mathematics can best be understood and explained socially and scientifically. That is, Learning Theories, Agents of Socialization, and more generally cultural and social milieu are relevant in trying to understand individuals' ideas about mathematics. The book begins by providing an overview of the current status in mathematics education. Popular cultural portrayals of mathematics and mathematicians are examined. The book then delves deeper into how students perceive mathematics and mathematicians by examining how students view mathematicians, how students define mathematics, and what themes emerge from students' mathematical autobiographies and their metaphors. The book describes a semantic differential in an effort to ascertain the meanings of math that people hold and shows the different patterns of responses among various groups of people. Finally, the book delves into mathematical mindsets, a current approach to understanding mathematical identities as well as success and failure in mathematics.
