Achieving Organizational Excellence Flevy Lasrado, 2018-05-01 This book bridges two essential aspects of assessing and achieving business excellence in 21st century organizations The author argues that transnational companies face a twofold challenge managing global knowledge networks and multicultural project teams on the one hand and interacting and collaborating across boundaries using global communication technologies on the other The author also argues that this dual challenge calls for the creation of a business excellence program that fits and thrives within these multicultural environments In response he reviews corporate practices in quality management and business excellence frameworks that have been extensively used on a transnational scale to drive organizational performance The book approaches quality management as an element that is no longer a choice but has now become a necessity if companies want to compete in highly globalized environments *Technology, Institutions and Labor* Fulya Apaydin, 2018-05-02 In this book Fulya Apaydin argues that labor responses to dramatic technological change are influenced by the political institutions of the Global South more than any other factor In addressing vocational education programs which are highly relevant in
