Heros Renaissance Tome:

Volume 5, Tome III: Kierkegaard and the Renaissance and Modern Traditions - Literature, Drama and Music

Jon Stewart,2016-12-05 The long period from the Renaissance to the nineteenth century supplied numerous sources for Kierkegaard's thought in any number of different fields The present rather heterogeneous volume covers the long period from the birth of Savonarola in 1452 through the beginning of the nineteenth century and into Kierkegaard's own time The Danish thinker read authors representing vastly different traditions and time periods Moreover he also read a diverse range of genres His interests concerned not just philosophy theology and literature but also drama and music The present volume consists of three tomes that are intended to cover Kierkegaard's sources in these different fields of thought Tome III covers the sources that are relevant for literature drama and music Kierkegaard was well read in the European literature of the seventeenth and eighteenth century He was captivated by the figure of Cervantes Don Quixote who is used as a model for humor and irony He also enjoyed French literature represented here by articles on Chateaubriand Lamartine and M Rim e French dramatists were popular on the Danish stage and Kierkegaard demonstrated an interest in among others Moli re and Scribe Although he never possessed strong English skills this did not prevent him from familiarizing himself with English literature primarily with the help of German translations While there is an established body of secondary material on Kierkegaard's relation to Shakespeare little has been said about his use of the Irish dramatist Sheridan It is obvious from among other things The Concept of Irony that Kierkegaard knew in detail the works of some of the main writers of the German Romantic movement However his use of the leading figures of the British Romantic movement Byron and Shelley remains largely unexplored terrain The classic Danish authors of the eighteenth century Holberg Wessel and Ewald were influential figures who prepared the way for the Golden Age of Danish poetry Kierkegaard constantly refers to their dramatic characters whom he often employs to illustrate a philosophical idea with a pregnant example or turn of phrase Finally while Kierkegaard is not an obvious name in musicology his analysis of Mozart's Don Giovanni shows that he had a keen interest in music on many different levels The Hero's Life Choice. Studies on Heracles at the Crossroads, the Judgement of Paris, and Their Reception Malcolm Davies,2023-09-04 Two allegorical ancient Greek stories about a young hero's career defining choice are shown in this book to have later been appropriated to radically differing effects E g a male's choice between female personifications can morph into a female's choice between the same or between various male personifications Never before have so many instances of this process from art literature music even landscape gardening been culled Illustrations mainly colour many brought into this context for the first time are conveniently incorporated into the text thus mimetically mirroring a central theme of the book the process of visualising the verbal verbalising the visual A Hero of the Nineteenth Century ,1894 *Visualizing the Past in Italian Renaissance Art* Jennifer Cochran Anderson,Douglas N.

Dow,2021-03-22 The essays in Visualizing the Past in Italian Renaissance Art address a foundational concept that was as

central to early modern thinking as it is to our own that the past is always an important part of the present Written by the friends students and colleagues of Dr Brian Curran former professor of Art History at the Pennsylvania State University these authors demonstrate how reverberations of the past within the present are intrinsic to the ways in which we think about the history of art Examinations of sculpture painting and architecture reveal the myriad ways that history has been appropriated reinvented and rewritten as subsequent generations including the authors collected here have attained new insight into the past and present Contributors Denise Costanzo William E Wallace Theresa A Kutasz Christensen Ingrid Rowland Anthony Cutler Marilyn Aronberg Lavin Louis Alexander Waldman Elizabeth Petersen Cyron Stuart Lingo Jessica Boehman Katherine M Bentz Robin L Thomas and John Pinto Rethinking the High Renaissance Jill Burke,2017-07-05 The perception that the early sixteenth century saw a culmination of the Renaissance classical revival only to degrade into mannerism shortly after Raphael s death in 1520 has been extremely tenacious but many scholars agree that this tidy narrative is deeply problematic Exploring how we can reconceptualize the High Renaissance in a way that reflects how we research and teach today this volume complicates and deepens our understanding of artistic change Focusing on Rome the paradigmatic centre of the High Renaissance narrative each essay presents a case study of a particular aspect of the culture of the city in the early sixteenth century including new analyses of Raphael s stanze Michelangelo s Sistine Ceiling and the architectural designs of Bramante The contributors question notions of periodization reconsider the Renaissance relationship with classical antiquity and ultimately reconfigure our understanding of high Renaissance style **A Brief Illustrated History of Machines and Mechanisms** Emilio Bautista Paz,Marco Ceccarelli,Javier Echávarri Otero,José Luis Muñoz Sanz,2010-08-02 Machines have always gone hand in hand with the cultural development of mankind throughout time A book on the history of machines is nothing more than a specific way of bringing light to human events as a whole in order to highlight some significant milestones in the progress of knowledge by a complementary perspective into a general historical overview This book is the result of common efforts and interests by several scholars teachers and students on subjects that are connected with the theory of machines and mechanisms In fact in this book there is a certain teaching aim in addition to a general historical view that is more addressed to the achievements by homo faber than to those by homo sapiens since the proposed history survey has been developed with an engineering approach The brevity of the text added to the fact that the authors are probably not competent to tackle historical studies with the necessary rigor means the content of the book is inevitably incomplete but it nevertheless attempts to fulfil three basic aims First it is hoped that this book may provide a stimulus to promote interest in the study of technical history within a mechanical engineering context Few are the countries where anything significant is done in this area which means there is a general lack of knowledge of this common cultural heritage Renaissance Fun Philip Steadman,2021-04-13 Renaissance Fun is about the technology of Renaissance entertainments in stage machinery and theatrical special effects in gardens and fountains and in the automata and self playing musical instruments that were

installed in garden grottoes How did the machines behind these shows work How exactly were chariots filled with singers let down onto the stage How were flaming dragons made to fly across the sky How were seas created on stage How did mechanical birds imitate real birdsong What was artificial music three centuries before Edison and the phonograph How could pipe organs be driven and made to play themselves by waterpower alone And who were the architects engineers and craftsmen who created these wonders All these questions are answered At the end of the book we visit the lost garden of marvels at Pratolino with its many grottoes automata and water jokes and we attend the performance of Mercury and Mars in Parma in 1628 with its spectacular stage effects and its music by Claudio Monteverdi one of the places where opera was born Renaissance Fun is offered as an entertainment in itself But behind the show is a more serious scholarly argument centred on the enormous influence of two ancient writers on these subjects Vitruvius and Hero Vitruvius's Ten Books on Architecture were widely studied by Renaissance theatre designers Hero of Alexandria wrote the Pneumatics a collection of designs for surprising and entertaining devices that were the models for sixteenth and seventeenth century automata A second book by Hero On Automata Making much less well known then and now describes two miniature theatres that presented plays without human intervention One of these it is argued provided the model for the type of proscenium theatre introduced from the mid sixteenth century the generic design which is still built today As the influence of Vitruvius waned the influence of Hero grew

Ezra Pound and the Mysteries of Love Akiko Miyake, 1991 For more than a decade scholars have understood that Ezra Pound employed mystical concepts of love in his writing of The Cantos In Ezra Pound and the Mysteries of Love Akiko Miyake furthers this understanding by looking at The Cantos as a major work in the Christian mystic religious tradition The author uncovers in the five volumes of Gabriel Dante Rossetti's *Il mistero dell'amor platonico del medio evo* the crucial link between The Cantos and the traditions of mystical love established by the ancient Greeks at Eleusis and borrowed by the late medieval Italian and Provençal poets Drawing upon this key five volume work as well as comprehensive research in both primary and secondary sources Miyake brings the partial perceptions of other critics and commentators into an illuminating whole Disclosing the deliberateness of The Cantos Miyake provides new insight into Pound's sense of culture and into the nature of his Confucianism She sheds light on the disastrous path Pound followed into Fascism and anti-Semitism and in contrast to the image of a pagan Pound that has emerged in recent years reveals a poet writing as a Christian from within the Christian mythical tradition

The Classical Tradition Anthony Grafton, Glenn W. Most, Salvatore Settis, 2010-10-25 A vast cabinet of curiosities Stephen Greenblatt Eclectic rather than exhaustive less an encyclopedia than a buffet Frederic Raphael Literary Review How do we get from the polis to the police Or from Odysseus's sirens to those of an ambulance The legacy of ancient Greece and Rome is all around us imitated resisted reworked and misunderstood In this beautifully illustrated and encyclopedic compendium a team of leading scholars investigates the afterlife of this rich heritage in the fields of literature philosophy art architecture history politics religion and science From

Academy to Zoology Aristotle and the Argonauts to Pegasus and Persia The Classical Tradition looks at facts and adages people places and ideas to reveal how the Classical tradition has shaped human endeavors from government to medicine drama to urban planning legal theory to popular culture At once authoritative and accessible learned and entertaining it illuminates the vitality of these enduring influences

Le héros inachevé Christine Sukič, 2005 Le poète anglais George Chapman 1559-1634 est surtout connu pour sa traduction d'Homère qu'il considérait comme son œuvre majeure Il a aussi laissé des tragédies sujet français dans lesquelles se fait jour l'idologie d'un auteur conscient de la crise pistologique de son temps esprit rictant devant les soubresauts de la nouveauté mais galement penseur de la modernité balbutiante Ces pièces qui constituent aussi un commentaire politique sur l'actualité anglaise du temps mettent en scène des héros l'ancienne dans un contexte moderne de relativisme moral Cette étude tente de montrer que l'esthétique de Chapman au service de son idologie est fondée sur ces tensions mettant en jeu disproportions du temps et de l'espace mouvement et instabilité Le héros lui reste inachevé tentant de survivre par l'ostentation et la transgression il signe sa disparition laissant l'image d'une statue en trompe l'œil d'un sordide cliché archaïque d'un hérosme finissant
