

The design solutions include bending the oil for the hydraulic cylinders through the cylinder sections, which allows for all extension reeling or reeling on the roller beam.

The main extensions of model 095-A cranes are hydraulic, retractable at almost 75 meters.

HEBAB 095 – the strong choice in the 10 tm class

The HEBAB 095 is a further development of the popular HEBAB 090, but it does everything better. Both cranes look very similar, but that's where the similarities cease.

The HEBAB 095 features a new, low-headroom boom system with a separate telescopic cylinder on each extension, we have done away with all moving on the outer boom and extensions and reduced the need for a hook attachment to just one – on the outer extension. All this leads to easier handling in confined areas. And being larger cylinders consistently reduce friction and give smoother boom action.

The HEBAB 095's working geometry has been optimized, resulting in better lifting capacity – in the upper lifting range, capacity has been boosted by over 20%. What's more, the 095 has an amazing close-in lifting height.

The HEBAB 095 is a modern general cargo crane in the 10 tm capacity class, that offers excellent maneuverability. Choose between cruise controls, HEBAB's well-known 360-degree version with the new computerized 360 or the more advanced computerized with HEBAB vision 360 and 360-360 or 360-360-360.

A pressure to control and control with the ControlOne 360 remote control. In an advanced, the most advanced ControlOne.
