How to Use MLA Format

The first step to MLA format is locating the Header function in Microsoft Word. From the "Insert" menu, click on "Page Number" and select "Top of Page," and then the third option, "Plain Number 3." The page number function will automatically number your pages for you. Place your space bar right before the number (1) and type in your last name, followed by a single space. Double click outside of the Header box to return to the main document.

The Heading, which is different than the Header, is the information at the top left hand side of the first page of every MLA-formatted document. The format is very specific: your name, the instructor's name, the title of the course, and then the date. The date must be in the format shown: 9 August 2010. Traditional American formatting (August 9, 2015) is not correct for MLA Style.

In MLA format, the title should be centered on the line following the date. Do not use bold, underline, or italic fonts, *unless* the title of a book is included in the title of your paper. In that case, italicize the title of the book (but not the rest of the title of your paper.)

Your entire paper must be double spaced, and there should be no extra spaces between the Heading and the Title, or the Title and the first paragraph. When you are ready to write your first paragraph, make sure you remember to indent by pressing the "Tab" key one time. Your document must have 1 inch margins, and you must use Times New Roman, 12 point size. No other fonts are acceptable.
