Two Cheers for Higher Education Steven Brint, 2019-01-08 A leading expert challenges the prevailing gloomy outlook on higher education with solid evidence of its successes Crushing student debt rapidly eroding state funding faculty embroiled in speech controversies a higher education market disrupted by online competition today's headlines suggest that universities power to advance knowledge and shape American society is rapidly declining But Steven Brint a renowned analyst of academic institutions has tracked numerous trends demonstrating their vitality After a recent period that witnessed soaring student enrollment and ample research funding universities he argues are in a better position than ever before Focusing on the years 1980 2015 Brint details the

trajectory of American universities which was influenced by evolving standards of disciplinary professionalism market driven partnerships especially with scientific and technological innovators outside the academy and the goal of social inclusion Conflicts arose academic entrepreneurs for example flouted their campus responsibilities and departments faced backlash over the hiring of scholars with nontraditional research agendas Nevertheless educators commitments to technological innovation and social diversity prevailed and created a new dynamism Brint documents these successes along with the challenges that result from rapid change Today knowledge driven industries generate almost half of U S GDP but divisions by educational level split the American political order Students flock increasingly to fields connected to the power centers of American life and steer away from the liberal arts And opportunities for economic mobility are expanding even as academic expectations decline In describing how universities can meet such challenges head on especially in improving classroom learning Brint offers not only a clear eyed perspective on the current state of American higher education but also a pragmatically optimistic vision for the future
