

3. Marking points

3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which students have provided extra responses. The general principle to be followed in such a situation is that 'right + wrong = wrong'.

Each error / contradiction negates each correct response. So, if the number of error / contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as * in example 1) are not penalised.

Example 1: What is the pH of an acidic solution?

[1 mark]

Student	Response	Marks awarded
1	green, 5	0
2	red*, 5	1
3	red*, 8	0

Example 2: Name two planets in the solar system.

[2 marks]

Student	Response	Marks awarded
1	Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune	0

3.2 Marking of short-answer questions (multiple)

For questions asking for short-answer responses, students are given a set number of responses. If a student gives the given number of responses, the question is marked as correct. If the student gives more responses, each additional response is marked as wrong.

3.3 Marking procedures for calculations

Students should be awarded the mark for each step of the calculation completed correctly. No students will be awarded a mark for the wrong final answer only. For example, the student who gives the correct final answer, but uses the wrong working, will not be awarded a mark.

3.4 Interpretation of 0

Students using the word 'no' should be given credit only if it is clear that they do not know the correct answer.
