in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type: core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive and thoroughly indexed, and the only guide of its kind, Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands on science teaching, and concerned parents.

Using Google Earth™: Bring the World into Your Classroom Levels 3-5 JoBea Holt, 2012-02-01 Learn to use Google Earth and add technological richness across the content areas in grades 3-5 with this highly engaging, easy to use resource that offers flexibility for authentic 21st century learning. This teacher friendly book provides step by step instructions, lessons and activities that integrate this technology into social studies, science, mathematics and English language arts curriculum. All lessons are differentiated for a variety of learning styles and activities are leveled for all learners. In addition, suggestions for flexible groupings and for extension activities are also included. Using Google Earth™ Bring the World Into Your Classroom shows teachers how to help their students start their own kmz folders and fill them with layers of locations that connect their own lives to the curriculum and to build cross curricular connections. The included Teacher Resource CD includes templates plus clear, easy to follow directions to lead students and teachers to see a global view by starting with their own neighborhoods and then moving outward. This resource is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills and supports core concepts of STEM instruction.
